Eggers, J.S. Griffiths, S. Parry, M.G. Culshaw, 2016-10-12 *Developments in Engineering Geology* is a showcase of the diversity in the science and practice of engineering geology All branches of geology are applicable to solving engineering problems and this presents a wide frontier of scientific opportunity to engineering geology In practice diversity represents a different set of challenges with the distinctive character of the profession derived from the crossover between the disciplines of geology and engineering This book emphasizes the importance of understanding the geological science behind the engineering behaviour of a soil or rock It also highlights a continuing expansion in the practice areas of engineering geology and illustrates how this is opening new frontiers to the profession thereby introducing new knowledge and technology across a range of applications This is initiating an evolution in the way geology is modelled in engineering geohazard and

environmental studies in modern and traditional areas of engineering geology *Regional Visionaries and Metropolitan Boosters* Matthew Dalbey, 2012-12-06 This book is an examination of two conflicting regional planning ideologies and the impact of this conflict on the development of two regional parkways I hypothesize that regional parkways of the 1920s and 1930s emerged out of these two visions of regional planning regionalism and metropolitanism The regional view coalesced around the work of Benton MacKaye Lewis Mumford and the Regional Planning Association of America The metropolitan viewpoint while less definable grew out of the market oriented economic boosterism efforts associated with early twentieth century planning This view found literal and philosophical support with Thomas Adams and the Regional Plan of New York and Its Environs In an effort to flesh out the competing theories and the development of the regional parkway I discuss the history of the Skyline Drive and the proposed Green Mountain Parkway In addition to supplementing the planning history and theory literature I try to inform on issues important to the contemporary planning profession The regional visionaries viewed their regional work as a social reform effort The metropolitanists wanted to tweak the market so as to provide for a minimized congestion and economic hardship for the greatest number of citizens This vision versus reality still troubles the profession today especially in the areas of sustainable development growth management and smart growth Matthew Dalbey Jackson Mississippi March 2002 Chapter 1 Decentralization and Regional Planning Practical and Ideological Problems 1
