## **From Kosovo To Kabul Human Rights And International Intervention:**

From Kosovo to Kabul and Beyond David Chandler, 2006 This new and updated edition of David Chandler's acclaimed book takes a critical look at the way in which human rights issues have been brought to the fore in international affairs. The UN and NATO's new policy of interventionism as shown in Iraq, Somalia, Bosnia, Kosovo, and East Timor has been hailed as part of a new ethical approach to foreign policy. David Chandler offers a rigorous critique of this apparently benign shift in international relations to reveal the worrying political implications of a new human rights discourse. He asks why the West can now prioritise the rights of individuals over the traditional rights of state sovereignty and why this shift has happened so quickly. Charting the development of a human rights based foreign policy, he considers the theoretical problems of defining human rights and sets this within the changing framework of international law. Meticulous and compelling, *From Kosovo to Kabul and beyond* offers a disturbing insight into the political implications of a human rights led foreign policy and the covert agenda that it conceals.

From Kosovo to Kabul David Chandler, 2002 Having written widely about human rights and international relations, Chandler does not here attempt a history of them or their interrelationship. Rather, he analyzes why the ethical agenda of human rights has become widely accepted since 1990 and indicates areas in which there appear to be limitations or at least important questions over the implications of this shift in approach. *Waging War to Make Peace* Susan Yoshihara, 2010-04-09 A revealing examination looks at the decision making in four NATO capitals about waging war in Kosovo and Iraq. Written by a combat veteran who also served on the faculty of the Naval War College, *Waging War to Make Peace*. U.S. Intervention in Global Conflicts is a thought provoking analysis of the decision to make war in the modern world. The subject is examined through the lens of the decision making of four NATO nations: Britain, France, Germany, and the United States in the 1999 Kosovo campaign compared to their decisions in 2003 regarding the Iraq war. What emerges is a picture of how the bitter dispute over Iraq was the result of disagreements about who has the authority to wage war when it is justified and whether nations have an obligation to intervene in the case of human rights and humanitarian emergencies. The book shows how those who enthusiastically hailed a new era of warfare based upon human rights and humanitarian values misjudged the significance of the Kosovo decision and it underscores issues with which leaders must come to grips if NATO allies are to avoid broader disputes in the years ahead.

Cultural Heritage, Ethics and the Military Peter G. Stone, 2011 The world reacted with horror to the images of the looting of the National Museum in Iraq in 2003 closely followed by other museums and then largely unchecked or archaeological sites across the country This outcome had been predicted by many archaeologists with some offering to work directly with the military to identify museums and sites to be avoided and protected However this work has since been heavily criticised by others working in the field who claim that such collaboration lent a legitimacy to the invasion It has therefore served to

focus on the broader issue of whether archaeologists and other cultural heritage experts should ever work with the military and if so under what guidelines and strictures The essays in this book drawn from a series of international conferences and seminars on the debate provide an historical background to the ethical issues facing cultural heritage experts and place them in a wider context Publisher s website *Exiting the Balkan Thicket* Gary Dempsey,2002 Goklany argues that selective application of this principle distorts the policy debate Encyclopedia of Governance Mark Bevir,2007 Lawyering Europe Antoine Vauchez,Bruno de Witte,2013-03-13 While scholarly writing has dealt with the role of law in the process of European integration so far it has shed little light on the lawyers and communities of lawyers involved in that process Law has been one of the most thoroughly investigated aspects of the European integration process and EU law has become a well established academic discipline with the emergence more recently of an impressive body of legal and political science literature on European law in context Yet this field has been dominated by an essentially judicial narrative focused on the role of the European courts underestimating in the process the multifaceted roles lawyers and law play in the EU polity notably the roles they play beyond the litigation arena This volume seeks to promote a deeper understanding of European law as a social and political phenomenon presenting a more complete view of the European legal field by looking beyond the courts and at the same time broadening the scholarly horizon by exploring the ways in which European law is actually made To do this it describes the roles of the great variety of actors who stand behind legal norms and decisions bringing together perspectives from various disciplines law political science political sociology and history to offer a global multi disciplinary reassessment of the role of law and lawyers in the European integration process **Global Issues** Shirley A.
