The Modern Urban Landscape E. C. Relph, 1987-08 Why do the cities of the late twentieth century look as they do What values do their appearance express and enfold Their sheer scale and the durability of their materials assure that our cities will inform future generations about our era in the same way that gothic cathedrals and medieval squares tell us something of the Middle Ages In the meantime our urban landscapes can tell us much about ourselves For E C Relph the urban landscape must be envisioned as a total environment not just streets and buildings but billboards and parking meters as well The Modern Urban Landscape traces the developments since 1880 in architecture technology planning and society that have formed the visual context of daily life Each of these shaping influences is often viewed in isolation but Relph surveys the ways in which they have operated independently to create what we see when we walk down a street shop in a mall or stare through a windshield on an expressway Two sets of ideas and fashions Relph argues have had an especially important impact on urban landscapes in the twentieth century An internationalism made possible by new building technologies and more rapid communications has replaced regional style and custom as the dominant feature of city appearance while a firm belief in the merits of self consciousness has imposed logical analysis and technical manipulation on such commonplace objects as curbstones and park benches As a result writes Relph the modern urban landscape is both rationalized and artificial which is another way of saying that it is intensely human

Dwell, 2008-12 At Dwell we're staging a minor revolution We think that it's possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines The Modern Urban Landscape (Routledge Revivals) Edward Relph, 2016-04-06 First

published in 1987 this book provides a wide ranging account of how modern cities have come to look as they do differing radically from their predecessors in their scale style details and meanings It uses many illustrations and examples to explore the origins and development of specific landscape features More generally it traces the interconnected changes which have occurred in architecture and aesthetic fashions in planning in economic and social conditions and which together have created the landscape that now prevails in most of the cities of the world This book will be of interest to students of architecture urban studies and geography *Cruising World*, 1987-01 **Diogenes Unveiled** Phil F.
