Leapfrogging Africa Reiner Klingholz,Sabine Sütterlin,Alisa Kaps,Catherina Hinz,2020-10-15 In this study we look at the potential for development leaps in Africa in three key sectors that provided the basis for socioeconomic development around the world health education and agriculture Advances in these sectors increase the human capital create jobs and economic opportunities and have a positive influence on each other Healthy and well fed children can learn better hygiene and better medical care diminish infant mortality which reduces the desire for a large number of children education for women promotes gender equality and causes birth rates to fall further This creates a population structure under which the economy can grow particularly well a demographic dividend becomes possible Africa Reset Harinder S. Kohli,2017-09-21 Africa faces both big opportunities and worrisome threats The Africa that emerges over the next 40 years whether it becomes a dynamic continent with a growing influence in the world or an economic backwater that exports its people and capital depends on what African countries do now The continent is growing and many socioeconomic indicators are improving but it is no longer catching up with the rest of the world it is not converging This book looks at Africa s economic performance over the last decade highlights the difference in performance across countries and identifies the biggest policy issues that need to be addressed if Africa is to converge with the rest of the world and meet the aspirations of its people Despite tougher global economic conditions slower growth lower commodity prices and tighter financial markets one out of four African countries have averaged per capita income growth above three percent for the last decade The progress of these high performers shows that it is what countries do the policies of their governments the responsiveness of their entrepreneurs the integrity of their institutions and the political will of their leaders that makes the difference not their resource endowments The challenge is to extend this African best practice to more countries of the continent This book shows that the consequences of such a reset can transform the continent but also that the human cost of not doing so would be staggering *Africa Emerges* Robert Rotberg,2013-07-10 Sub Saharan Africa is no longer a troubled dark continent Most of its constituent countries are now enjoying significant economic growth and political progress The new Africa has begun to banish the miseries of the past and appears ready to play an important role in world affairs Thanks to shifts in

leadership and governance an African renaissance could be at hand Yet the road ahead is not without obstacles As world renowned expert on African affairs Robert Rotberg expertly shows Africa today maybe poised to deliver real rewards to its long suffering citizens but it faces critical new crises as well as abundant new opportunities Africa Emerges draws on a wealth of empirical data to explore the key challenges Africa must overcome in the coming decades From peacekeeping to health and disease from energy needs to education this illuminating analysis diagnoses the remaining impediments Africa will need to surmount if it is to emerge in 2050 as a prosperous peaceful dynamic collection of robust large and small nations Africa Emerges offers an unparalleled guide for all those interested in the dynamics of modern Africa s political economic and social development

The New Scramble for Africa Padraig R. Carmody, 2013-04-26 Once marginalized in the world economy the past decade has seen Africa emerge as a major global supplier of crucial raw materials like oil uranium and coltan With its share of world trade and investment now rising and the availability of natural resources falling the continent finds itself at the centre of a battle to gain access to and control of its valuable natural assets China s role in Africa has loomed particularly large in recent years but there is now a new scramble taking place involving a wider range of established and emerging economic powers from the EU and US to Japan Brazil and Russia This book explores the nature of resource and market competition in Africa and the strategies adopted by the different actors involved be they world powers or small companies Focusing on key commodities the book examines the dynamics of the new scramble and the impact of current investment and competition on people the environment and political and economic development on the continent New theories particularly the idea of Chinese flexigemony are developed to explain how resources and markets are accessed While resource access is often the primary motive for increased engagement the continent also offers a growing market for low priced goods from Asia and Asian owned companies Individual chapters explore old and new economic power interests in Africa oil minerals timber biofuels food and fisheries and the nature and impacts of Asian investment in manufacturing and other sectors The New Scramble for Africa will be essential reading for students of African studies international relations and resource politics as well as anyone interested in current affairs
