Ransom, Dominick Grace, 2019-05-27 Canadian Science Fiction Fantasy and Horror Bridging the Solitudes exposes the limitations of the solitudes concept so often applied uncritically to the Canadian experience This volume examines Canadian and Québécois literature of the fantastic across its genres such as science fiction fantasy horror indigenous futurism and others and considers how its interrogation of colonialism nationalism race and gender works to bridge multiple solitudes Utilizing a transnational lens this volume reveals how the fantastic is ready made for exploring in non literal terms the complex and problematic nature of intercultural engagement *Round the World & Across Russia in 21 Days, 30 Years Later* Michael B. Butler , 2024-06-14 The just released book Round the World Across Russia in 21 Days 30 Years Later provides an in depth and historic look at a complex aviation adventure at a historical watershed moment in time Only months after the Soviet Union had collapsed this group of unlikely adventurers took off from Santa Monica Airport July 4 1992 and fly their single and twin engine privately owned general aviation aircraft 18 000 miles across some of the most inhospitable terrain in the world This unique aviation adventure took place in the wake of the dramatic and sudden collapse of the Soviet Union an event which unfolded during many months in midst of trying to organize this complex aviation adventure The World Flight Across Russia was the idea of Marcel Large President of Raid Intl and organizer of many car motorcycle and air rallies for decades prior to our event Hatched after taking the first private group of general aviation

aircraft into the Soviet Union in early 1991 he wanted it to go beyond just flying around the world across Soviet Union Designed as a annual event with a different group flying a different route across the Soviet Union each summer it ended up being across Russia and only took place that one honeymoon summer right after the collapse in July 1992 A fascinating part of the story was Marcel his wife Michelle Eric Vercesi and Paul Hollenbeck dealing with Soviet and then Russian authorities with no one truly knowing who could answer the most pressing questions at hand Moscow January 1992 Four people were in Moscow weeks after the Soviet Union voted itself out of business trying to organize a World Flight Across Russia Confusion reigned supreme six months after hard liners tried to reverse all those gains made during Gorbachev s reforms when Boris Yeltsin and the people made their famous stand for freedom in August 1991 Odds were stacked against their success as the world was still reeling from one amazingly startling fact The Cold War had just ended The 1st Annual Around the World Air Rally was the first western or civilian group of general aviation aircraft to circumnavigate while crossing the entire landmass of Russia but that is only part of the story Our group was under protection of one of the highest officials Vice President Rutskoi in an effort to create updated cultural and business ties between old enemies and new friends Five days in Moscow and across Siberia we carried the highest authority in our back pocket but sometimes in some places that was not enough

The Future of the Artificial Mind Alessio Plebe,Pietro Perconti,2022-06-09 The Future of the Artificial Mind is about the social and technological challenges posed by the new wave of artificial intelligence both from a technical and a cognitive perspective Deep neural networks have brought about tremendous technological improvements This renaissance in artificial intelligence after decades of stagnation has enabled new technologies capable of surpassing human performance as in the case of visual recognition The book reviews the key ideas that have enabled these goals to be achieved and their historical origins The book also considers some of the ethical and social challenges that the future development of artificial intelligence will face Will humans fall in love with future android dolls What will artificial sex be like And what will it be like to travel in cars that will treat us as passengers instead of drivers But predicting the future appears more magic than science But when it comes to artificial intelligence it is a constant temptation Since it is well known that the only way to get rid of a temptation is to enjoy it the hypothesis considered in the last chapter is that emerging trends point to a near future in which intelligence will be ubiquitous but it will be difficult to identify its bearer We may be heading towards an era of widespread intelligence but an intelligence without accountability
