Artifacts Versus Nature Body Masayuki Matsui, 2023-12-30 This book proposes a wealth additive scheme of managing and maximizing win-win and sharing the marginal value eco-entropy of artifacts by humanizing the artifacts enterprise and their economics with nature This type of clockwork would be achieved on a base of the science of nature versus artifacts and the body of science in my Springer books since 2008 My books are advancing factory science economics and the science of artifacts and play their role in the sandwich theory and its pair map microcosm of the 3D type toward the development of body science Then the wealth additive goal of the body is not only similar to the marginal profit GDP and value in economics but also means the marginal diversity eco-entropy and its wealth of economics versus reliability sustainability in the body of the world The modern world for example is faced with deadlocked negotiations over the Sustainable Development Goals SDGs bodies at the United Nations Thus the forthcoming world of SDGs would be much better and more constructive at transforming traditional bodies of the 3M I class

human material money and information as some nano gene therblig transformation toward eco entropy marginal value diversity on earth This semi visible world is traditionally limited to a molecular size and is too rough at the practical rig level Thus any unsolved and invisible contradictions left behind on earth are subject to SDGs in the practical world This approach proposes a visible method that could find and solve these contradictions angles by transforming the artifact s body consisting of the 3M I gene The pair map microcosm and its Matsui s M equation have been designed mainly based on nature and science books on artifacts in 2016 and 2019 Following these visible methods our well being subject might be able to make a breakthrough or make such unsolved contradictions or stalemates subside as any SDGs society of individuals in the near future Finally the book will explore and construct a new academic discipline involving 3M I body science versus cybernetics And the study introduces validation cases of convenience stores self driving cars and robotization individualization of artificial objects as the realization of the supply demand system and the ideal form of artificial and natural bodies Based on this perspective the dialogue is conducted according to a creative structure of six parts twelve chapters and two appendices

Future Perfect Howard Bruce Franklin,1995 Critics science fiction writers scientists and scholars throughout the world hailed the original publication of Future Perfect in 1966 as a book that would transform our evaluation of science fiction and our understanding of American culture The praise has proved well founded for Future Perfect has been more responsible than any other single work for the recognition of the value and significance of science fiction *Science Fact and Science Fiction* Brian M. Stableford,2006 Publisher description *Ion Adventure in the Heartland* Dale Dubin,2003 A consilience or confluence of ionic molecular knowledge from many research disciplines correlated into a grand unifying functional model of cardiac physiology modulated by the autonomic nervous system *Eternity* Tom Knight,2024-12-15 Your greatest adventure is about to begin Have you ever contemplated the mysteries of Heaven and the magnificent realm of the angels Would you like to solve the ultimate enigma of the Afterlife Would it be possible in Paradise to explore strange eccentric worlds and exotic dimensions Now experience a mystical realm of existence that will carry us from the beginning of time to the end of the universe and beyond I will utter things which have been kept secret from the foundation of the world Mt 13 35

Traveling in Place Bernd Stiegler,2024-05-31 Armchair travel may seem like an oxymoron Doesn t travel require us to leave the house And yet anyone who has lost herself for hours in the descriptive pages of a novel or the absorbing images of a film knows the very real feeling of having explored and experienced a different place or time without ever leaving her seat No passport no currency no security screening required the luxury of armchair travel is accessible to us all In Traveling in Place Bernd Stiegler celebrates this convenient magical means of transport in all its many forms Organized into twenty one legs or short chapters Traveling in Place begins with a consideration of Xavier de Maistre s 1794 Voyage autour de ma chambre an account of the forty two day journey around his room Maistre undertook as a way to entertain himself while under house arrest Stiegler is fascinated by the notion of exploring the familiar as though it were completely new and

strange He engages writers as diverse as Roussel Beckett Perec Robbe Grillet Cort zar Kierkegaard and Borges all of whom show how the everyday can be brilliantly transformed Like the best guidebooks Traveling in Place is more interested in the idea of travel as a state of mind than as a physical activity and Stiegler reflects on the different ways that traveling at home have manifested themselves in the modern era from literature and film to the virtual possibilities of the Internet blogs and contemporary art Reminiscent of the pictorial meditations of Sebald but possessed of the intellectual playfulness of Calvino Traveling in Place offers an entertaining and creative Baedeker to journeying at home
