If you like this book write a review on google books [Speculative Blackness](#) André M. Carrington, 2016-02-29 In *Speculative Blackness* Andr M Carrington analyzes the highly racialized genre of speculative fiction including science fiction fantasy and utopian works along with their fan cultures to illustrate the relationship between genre conventions in media and the meanings ascribed to blackness in the popular imagination Carrington s argument about authorship fandom and race in a genre that has been both marginalized and celebrated offers a black perspective on iconic works of science fiction He examines the career of actor Nichelle Nichols who portrayed the character Uhura in the original Star Trek television series and later became a recruiter for NASA and the spin off series Star Trek Deep Space Nine set on a space station commanded by a black captain He recovers a pivotal but overlooked moment in 1950s science fiction fandom in which readers and writers of fanzines confronted issues of race by dealing with a fictitious black fan writer and questioning the relevance of race to his ostensible contributions to the zines Carrington mines the productions of Marvel comics and the black owned comics publisher Milestone Media particularly the representations of black sexuality in its flagship title *Icon* He also interrogates online fan fiction about black British women in *Buffy the Vampire Slayer* and the *Harry Potter* series Throughout this nuanced analysis Carrington theorizes the relationship between race and genre in cultural production revealing new

understandings of the significance of blackness in twentieth century American literature and culture Black Bodies That Matter James Garrison, 2024-12-15 Responding to interconnected tragedies affecting minority populations in America *Black Bodies That Matter Mourning Rage and Beauty* brings together the Black Lives Matter movement with the framework developed by Judith Butler in *Bodies That Matter* Butler's analysis of subject life as a kind of melancholy preempted mourning where loss itself is lost and her advocacy of public forms of grieving like the AIDS Quilt which brings lost lives out of the shadows highlight the problematic connection between memory and loss when it comes to subjects who do not fully matter as they should Taking her remarks on public memorials like the AIDS Quilt her reading of Michel Foucault's idea of the subject as a self surveilling prisoner and her examination of Louis Althusser's scene where the voice of police authority bellows Hey you there and creates the you that turns around beholden to conscience James Garrison examines resonances with black experience in America which itself is marked by violence surveillance imprisonment and encounters with the ominous voice of police authority Investigating a wide array of black cultural expression *Black Bodies That Matter* brings new insight to how mourning vulnerability and invulnerability rage and beauty connect to human dignity and the depth and breadth of black loss **Far Beyond The Moon** P. C. M. Vandermeer, 2024-02-21 One glimpse into my mind would drive you to insanity Maybe I want to go crazy all the way Just for once The life of Christopher Ennington is in shambles Volunteering at his local dog shelter is what gets the 38 year old through the days Battered by abuse disease and that particularly messed up thing dragged into the shelter he cannot believe his luck when he crosses paths with a mysterious stranger Gyth is kind dreamy and just as much of an outsider as Christopher Frankly it has seemed impossible to ever find love again but here he is enamored by brown eyes and a voice like honey Gyth has never planned on returning to this dimension But after his crash into it he is connected to the lonely creature who has saved his life And so he decides to stay and masquerades as a human himself With Christopher to teach him it's not too difficult and even fun Birds of a feather flock together after all But people in rural Massachusetts do not take kindly to this blossoming relationship It is only when Christopher learns of Gyth's eldritch nature that this world finally starts to change and they themselves with it What lies beneath the flesh must break free Cosmic horror and body horror entangled in a steamy queer romance literally Now available as a revised second edition with a bonus chapter *Beyond the Stars* Lynn David Livsey, 2000-11-17 This book *Beyond The Stars Trilogy Part One* covers all of cosmic science from quantum mechanics and the formation of particles to cosmology and the structure of space to evolution and the formation of life Moreover this book is sub divided into ten chapters and into ten reference chapters to make this information more understandable and digestible Chapter one The Structure of Space covers the composition and structure of space the elementary stage of particles the evolution of energy quasars and the formation of galaxies Chapter two Galaxies covers the composition and structure of galaxies dark matter interstellar dust clouds and the formation of light particles Chapter three Stars covers the formation of star clusters the

Adventures In Time And Space Mary Taylor (ed), 2012-10-23 From The Entropy Effect to The Q Continuum Pocket Books has published hundreds of pulse pounding thought provoking Star Trek novels in the twenty years since Pocket Books US became the official Star Trek publisher To date there have been 87 Original Series novels featuring Captain Kirk Mr Spock and their crew 50 Next Generation novels featuring the Captain Picard and the crew of the Enterprise D and E 26 set on Captain Sisko's space station Deep Space Nine and 18 following the adventures of Star Trek's newest crew on the USS Voyager Plus there've been numerous unnumbered series novels five multi volume crossover series and several movie tie ins From this abundance of riches editor Mary Taylor has compiled the ultimate anthology of gripping writing and memorable moments guaranteed to delight all Star Trek fans

A Different Trek David Kroening Seitz, 2023-07 A different kind of Star Trek television series debuted in 1993 Deep Space Nine was set not on a starship but a space station near a postcolonial planet still reeling from a genocidal occupation The crew was led by a reluctant Black American commander and an extraterrestrial first officer who had until recently been an anticolonial revolutionary DS9 extended Star Trek's tradition of critical social commentary but did so by transgressing many of Star Trek's previous taboos including religion money eugenics and interpersonal conflict DS9 imagined a twenty fourth century that was less a glitzy utopia than a critical mirror

of contemporary U S racism capitalism imperialism and heteropatriarchy Thirty years after its premiere DS9 is beloved by critics and fans but remains marginalized in scholarly studies of science fiction Drawing on cultural geography Black studies and feminist and queer studies A Different Trek is the first scholarly monograph dedicated to a critical interpretation of DS9 s allegorical world building If DS9 has been vindicated aesthetically this book argues that its prophetic place based critiques of 1990s U S politics which deepened the foundations of many of our current crises have been vindicated politically to a degree most scholars and even many fans have yet to fully appreciate Journey Beyond the Stars ,1988 Voyage Beyond the Stars Jules Verne,Percy Greg,David Lindsay,Edward Everett Hale,Edgar Wallace,H. Weinbaum,Malcolm Jameson,Otis Adelbert Kline,2022-11-13 In the vivid and expansive anthology Voyage Beyond the Stars a panoramic vista unfolds exploring the many dimensions of human imagination through the prism of outer space With narratives ranging from audacious exploratory tales to profound examinations of extraterrestrial existence this collection encapsulates the boundless possibilities of speculative fiction The anthology offers a curated selection of stories each a gem in its inventive portrayal of journeys across the cosmos Among these standout pieces captivate with their visionary look at humanity s place in the universe delivered through an array of literary styles from thrilling adventures to philosophical musings The anthology proudly features contributions from eminent authors who have sculpted the landscape of science fiction Pioneers like H G Wells and Jules Verne join voices with other luminaries creating a tapestry rich in historical context and cultural significance These authors emerged during pivotal movements in literature where the burgeoning curiosity about science and space ignited imaginations Their varied backgrounds provide a comprehensive lens on the themes of exploration and innovation offering readers an enriched perspective of this transformative era in literary history Voyage Beyond the Stars is an essential treasure for readers craving a comprehensive engagement with the depths of science fiction It affords an unprecedented opportunity to traverse myriad worlds and timelines crafted by some of the genre s most groundbreaking authors This anthology not only educates but also inspires by fostering a dialogue between past and present perspectives in speculative fiction It is a call to voyage beyond the stars and into a deeper understanding of both the universe and the creativity it inspires in humanity Far Beyond the Field Makoto Ueda,2003-03-17 Far Beyond the Field is a first of its kind anthology of haiku by Japanese women collecting translations of four hundred haiku written by twenty poets from the seventeenth century to the present By arranging the poems chronologically Makoto Ueda has created an overview of the way in which this enigmatic seventeen syllable form has been used and experimented with during different eras At the same time the reader is admitted to the often marginalized world of female experience in Japan revealing voices every bit as rich and colorful and perhaps even more lyrical and erotic than those found in male haiku Listen for instance to Chiyojo who worked in what has been long thought of as the dark age of haiku during the eighteenth century but who composed exquisitely fine poems tracing the smallest workings of nature Or Katsuro Nobuko who wrote powerfully erotic poems when she was

widowed after only two years of marriage And here too is a voice from today Mayuzumi Madoka whose meditations on romantic love represent a fresh new approach to haiku **Far Beyond the Moon** David P. D. Munns, Karin

Nickelsen, 2021-06-01 From the beginning of the space age scientists and engineers have worked on systems to help humans survive for the astounding 28 500 days 78 years needed to reach another planet They've imagined and tried to create a little piece of Earth in a bubble travelling through space inside of which people could live for decades centuries or even millennia Far Beyond the Moon tells the dramatic story of engineering efforts by astronauts and scientists to create artificial habitats for humans in orbiting space stations as well as on journeys to Mars and beyond Along the way David P D Munns and Karin Nickelsen explore the often unglamorous but very real problem posed by long term life support How can we recycle biological wastes to create air water and even food in meticulously controlled artificial environments Together they draw attention to the unsung participants of the space program the sanitary engineers nutritionists plant physiologists bacteriologists and algologists who created and tested artificial environments for space based on chemical technologies of life support as well as the bioregenerative algae systems developed to reuse waste water and nutrients so that we might cope with a space journey of not just a few days but months or more likely years **Far Beyond the Horizon** Pasquale De
