Farewell Promised Land Waking From:

Farewell, Promised Land Robert Dawson, Gray A. Brechin, 1999-01-01 Don't mistake the message of this sad and powerful book. After 150 years of pillage and pollution, it is time to fight like hell for California. Mike Davis, author of *City of Quartz*. A heart-rendingly splendid book for all who love California. It combines stunning photographic documentation of the trashing of the state with an eloquent melancholy text that still offers guarded hopes for a green future. Ernest Callenbach, author of *Ecotopia*.

Farewell, Promised Land Robert Dawson, Gray Brechin, 2023-12-22 Historical accounts of California tell of flocks of birds so dense in the sky that they cast a shadow on the ground and of thunderous rivers of geese, ducks and swans moving down the state to the lagoons of Mexico and beyond. Today, citizens and travelers in California take for granted skies empty of almost everything but the contrails of airplanes. But far more than wildlife is missing from California today. In text and photographs, *Farewell Promised Land* documents the stark contrast between the California landscape of this past and what it has become as it traces the evolution of the California environment and looks ahead to what the future holds. When writer Gray Brechin and photographer Robert Dawson received the 1992 Dorothea Lange-Paul Taylor Prize from Duke University's Center for Documentary Studies, they began a five-year project of driving and flying around California to record the present state of its environment. This book is the result of that collaboration. In six thematic chapters dealing with Loss, Mining, Farming, Cities, Energy and Health, the authors provide a sobering look at California's environment. A concluding chapter introduces individuals and organizations now attempting to redeem the state from its present course. *Farewell Promised Land* is a superb vehicle for communicating the causes, context and seriousness of environmental and social disruptions in California. It is unique in that it successfully documents topics such as energy, health and cities and brings this information directly to bear on environmental issues. Appealing to the intellect as well as to our sense of aesthetics, Brechin and Dawson provide a timely wake-up call in this brave, honest and straightforward assessment of California's fate. Historical accounts of California tell of flocks of birds so dense in the sky that they cast a shadow on the ground and of thunderous rivers of geese, ducks and swans moving down the state to the lagoons of Mexico and beyond. Today, citizens and travelers

Imperial San Francisco, With a New Preface Gray Brechin, 2006-10-03 First published in 1999, this celebrated history of San Francisco traces the exploitation of both local and distant regions by prominent families: the Hearsts, the Youngs, the Spreckelses and others who gained power through mining, ranching, water and energy, transportation, real estate, weapons and the mass media. The story uncovered by Gray Brechin is one of greed and ambition on an epic scale. Brechin arrives at a new way of understanding urban history as he traces the connections between environment, economy and technology and discovers links that led ultimately to the creation of the atomic bomb and the nuclear arms race. In a new preface, Brechin considers the vulnerability of cities in the post-9/11 twenty-first century.

Dominion from Sea to Sea Bruce Cumings, 2009-11-17 America is the first world power to inhabit an immense land mass open at both ends to the world's two largest oceans the Atlantic and the Pacific This

gives America a great competitive advantage often overlooked by Atlanticists whose focus remains overwhelmingly fixed on America's relationship with Europe Bruce Cumings challenges the Atlanticist perspective in this innovative new history arguing that relations with Asia influenced our history greatly Cumings chronicles how the movement westward from the Middle West to the Pacific has shaped America's industrial technological military and global rise to power He unites domestic and international history international relations and political economy to demonstrate how technological change and sharp economic growth have created a truly bicoastal national economy that has led the world for more than a century Cumings emphasizes the importance of American encounters with Mexico the Philippines and the nations of East Asia The result is a wonderfully integrative history that advances a strong argument for a dual approach to American history incorporating both Atlanticist and Pacificist perspectives
