Fritz John Collected Papers J. Moser, 2011-10-22 Fritz John Collected Papers J. Moser, 1985-01-01 **Fritz John Collected Papers** J. Moser, 1985-01-01 Collected Papers Fritz John, 1985 **Mathematics from Leningrad to Austin, Volume 2** Rudolph A. Lorentz, 1997-07-15 The works of George G Lorentz spanning more than 60 years have played a significant role in the development and evolution of mathematical analysis The papers presented in this volume represent a selection of his best works along with commentary from his students and colleagues **Selected Papers on Algebra and Topology by Garrett Birkhoff** J.S. Oliveira, G.-C. Rota, 1987-01-01 The present volume of reprints are what I consider to be my most interesting and influential papers on algebra and topology To tie them together and to place them in context I have supplemented them by a series of brief essays sketching their historical background as I see it In addition to these I have listed some subsequent papers by others which have further developed some of my key ideas The papers on universal algebra lattice theory and general topology collected in the present volume concern ideas which have become familiar to all working mathematicians It may be helpful to make them readily accessible in one volume I have tried in the introduction to each part to state the most significant features of each paper reprinted there and to indicate later developments The background that shaped and stimulated my early work on universal algebra lattice theory and topology may be of some interest As a Harvard undergraduate in 1928-32 I was encouraged to do independent reading and to write an original thesis My tutorial reading included de la Vallée Poussin's beautiful *Cours d'Analyse Infinitesimale* Hausdorff's *Grundzüge der Mengenlehre* and Fréchet's *Espaces Abstraits* In addition I discovered Carathéodory's 1912 paper *Über das lineare Mass von Punktmengen* and Hausdorff's 1919 paper on *Dimension und Äusseres Mass* and derived much inspiration from them A fragment of my thesis analyzing axiom systems for separable metrizable spaces was later published 2 This background led to the work summarized in Part IV *Selected Papers of Norman Levinson* J.A. Nohel, D.H. Sattinger, Gian-Carlo Rota, 1997-12-18 The deep and original ideas of Norman Levinson have had a lasting impact on fields as diverse as differential integral equations harmonic complex stochastic analysis and analytic number theory during more than half a century Yet the extent of his contributions has not always been fully recognized in the mathematics community For example the horseshoe mapping constructed by Stephen Smale in 1960 played a central role in the development of the modern theory of dynamical systems and chaos The horseshoe map was directly stimulated by Levinson's research on forced periodic oscillations of the Van der Pol oscillator and specifically by his seminal work initiated by Cartwright and Littlewood In other topics Levinson provided the foundation for a rigorous theory of singularly perturbed differential equations He also made fundamental contributions to inverse scattering theory by showing the connection between scattering data and spectral data thus relating the famous Gel'fand-Levitan method to the inverse scattering problem for the Schrödinger equation He was the first to analyze and make explicit use of wave functions now widely known as the Jost functions Near the end of his life Levinson returned to research in analytic

number theory and made profound progress on the resolution of the Riemann Hypothesis Levinson's papers are typically tightly crafted and masterpieces of brevity and clarity It is our hope that the publication of these selected papers will bring his mathematical ideas to the attention of the larger mathematical community **Mathematics Related to Physics** Raoul Bott, 1994 Volume 4 Notices of the American Mathematical Society American Mathematical Society, 1990 Books in Series , 1985 Vols for 1980 issued in three parts Series Authors and Titles *Journal of the Mathematical Society of Japan* Nihon Sūgakkai, 1985 *Books in Series, 1876-1949* R.R. Bowker Company, 1982 **Combined Membership List of the American Mathematical Society and the Mathematical Association of America** American Mathematical Society, 1988 Lists for 19 include the Mathematical Association of America and 1955 also the Society for Industrial and Applied Mathematics Jakob Nielsen, Collected Mathematical Papers: 1932-1955 Jakob Nielsen, 1986 **Subject Guide to Books in Print** , 1993 **The Mathematical Intelligencer** , 1986 Transactions of the ... Conference of Army Mathematicians , 1973 *Scientific and Technical Books and Serials in Print* , 1989 **Impact of Science on Society** , 1990 *Books in Print Supplement* , 1985
