From Alchemy to Chemistry and Psychology E. Weil (Firm),194? Alchemy and Chemistry in the 16th and 17th Centuries P. Rattansi, Antonio Clericuzio,2013-03-07 The present volume owes its ongm to a Colloquium on Alchemy and Chemistry in the Sixteenth and Seventeenth Centuries held at the Warburg Institute on 26th and 27th July 1989 The Colloquium focused on a number of selected themes during a closely defined chronological interval on the relation of alchemy and chemistry to medicine philosophy religion and to the corpuscular philosophy in the sixteenth and seventeenth centuries The relations between Medicina and alchemy in the Lullian treatises were examined in the opening paper by Michela Pereira based on researches on unpublished manuscript sources in the period between the 14th and 17th centuries It is several decades since the researches of R F Multhauf gave a prominent role to Johannes de Rupescissa in linking medicine and alchemy through the concept of a quinta essentia Michela Pereira explores the significance of the Lullian tradition in this development and draws attention to the fact that the early Paracelsians had themselves recognized a family resemblance between the works of Paracelsus and Roger Bacon s scientia experimentalis and indeed a continuity with the Lullian tradition **The Story of Alchemy and Early Chemistry (The Story of Early Chemistry)** John Maxson Stillman,1960 Originally published under the title The Story of Early Chemistry Tells the story of the development of chemical knowledge and science from the beginning of time to the end of the 18th century Distilling Knowledge Bruce T. Moran,2006-09-01 The metaphor of the Scientific Revolution Moran argues can be expanded to make sense of alchemy and other so called pseudo sciences by including a new framework in which process can count as an object in which making leads to learning and in which the messiness of conflict leads to discernment *Alchemy and Chemistry* Lawrence Michael Principe,2014 **A Chemical History Tour** Arthur Greenberg,2000-03-07 Take a stroll through this one of a kind book that offers readers an illustrated tour of how chemistry developed from alchemy to the emergence of chemistry as a scientific discipline in the early 17th century and finally modern day chemistry Discover this rare collection of more than 180 illustrations spanning 400 years of chemical publications with each illustration accompanied by an essay discussing its significance in the context of historical scientific beliefs as well as modern chemical science The author s knowledge and enthusiasm for the books images and subject matter are clearly reflected throughout the very readable informative and frequently funny essays High quality full page reproductions from the author s art collection published from 1599 to the

present are eloquently displayed The Alchemists F. Sherwood Taylor,2013-10 This is a new release of the original 1949 edition *Textual Healing: Essays on Medieval and Early Modern Medicine* Elizabeth Lane Furdell,2021-09-20 **The Chemistry of Alchemy** Cathy Cobb, Monty Fetterolf, Harold Goldwhite,2014-07-01 A unique approach to the history of science using do it yourself experiments along with brief historical profiles to demonstrate how the ancient alchemists stumbled upon the science of chemistry Be the alchemist Explore the legend of alchemy with the science of chemistry Enjoy over twenty hands on demonstrations of alchemical reactions In this exploration of the ancient art of alchemy three veteran chemists show that the alchemists quest involved real science and they recount fascinating stories of the sages who performed these strange experiments Why waste more words on this weird deviation in the evolution of chemistry As the authors show the writings of medieval alchemists may seem like the ravings of brain addled fools but there is more to the story than that Recent scholarship has shown that some seemingly nonsensical mysticism is in fact decipherable code and Western European alchemists functioned from a firmer theoretical foundation than previously thought They had a guiding principle based on experience separate and purify materials by fire and reconstitute them into products including of course gold and the universal elixir the Philosophers stone Their efforts were not in vain by trial by error by design and by persistence the alchemists discovered acids alkalis alcohols salts and exquisite powerful and vibrant reactions which can be reproduced using common products minerals metals and salts So gather your vats and stoke your fires Get ready to make burning waters peacocks tails Philosophers stone and of course gold **The Story of Alchemy and the Beginnings of Chemistry** M. M. Pattison Muir,2017-06-03 CHAPTER I THE EXPLANATION OF MATERIAL CHANGES GIVEN BY THE GREEK THINKERS For thousands of years before men had any accurate and exact knowledge of the changes of material things they had thought about these changes regarded them as revelations of spiritual truths built on them theories of things in heaven and earth and a good many things in neither and used them in manufactures arts and handicrafts especially in one very curious manufacture wherein not the thousandth fragment of a grain of the finished article was ever produced The accurate and systematic study of the changes which material things undergo is called chemistry we may perhaps describe alchemy as the superficial and what may be called subjective examination of these changes and the speculative systems and imaginary arts and manufactures founded on that examination We are assured by many old writers that Adam was the first alchemist and we are told by one of the initiated that Adam was created on the sixth day being the 15th of March of the first year of the world certainly alchemy had a long life for chemistry did not begin until about the middle of the 18th century No branch of science has had so long a period of incubation as chemistry There must be some extraordinary difficulty in the way of disentangling the steps of those changes wherein substances of one kind are produced from substances totally unlike them To inquire how those of acute intellects and much learning regarded such occurrences in the times when man s outlook on the world was very different from what it is now ought to be interesting and the results of that inquiry must surely be

instructive If the reader turns to a modern book on chemistry for instance *The Story of the Chemical Elements* in this series he will find at first superficial descriptions of special instances of those occurrences which are the subject of the chemist's study he will learn that only certain parts of such events are dealt with in chemistry more accurate descriptions will then be given of changes which occur in nature or can be produced by altering the ordinary conditions and the reader will be taught to see certain points of likeness between these changes he will be shown how to disentangle chemical occurrences to find their similarities and differences and gradually he will feel his way to general statements which are more or less rigorous and accurate expressions of what holds good in a large number of chemical processes finally he will discover that some generalisations have been made which are exact and completely accurate descriptions applicable to every case of chemical change But if we turn to the writings of the alchemists we are in a different world There is nothing even remotely resembling what one finds in a modern book on chemistry Here are a few quotations from alchemical writings It is necessary to deprive matter of its qualities in order to draw out its soul Copper is like a man it has a soul and a body the soul is the most subtle part that is to say the tinctorial spirit The body is the ponderable material terrestrial thing endowed with a shadow After a series of suitable treatments copper becomes without shadow and better than gold The elements grow and are transmuted because it is their qualities not their substances which are contrary Stephanus of Alexandria about 620 A D
