Animal Minds Donald R. Griffin,2024-05-31 In Animal Minds Donald R Griffin takes us on a guided tour of the recent explosion of scientific research on animal mentality Are animals consciously aware of anything or are they merely living machines incapable of conscious thoughts or emotional feelings How can we tell Such questions have long fascinated Griffin who has been a pioneer at the forefront of research in animal cognition for decades and is recognized as one of the leading behavioral ecologists of the twentieth century With this new edition of his classic book which he has completely revised and updated Griffin moves beyond considerations of animal cognition to argue that scientists can and should investigate questions of animal consciousness Using examples from studies of species ranging from chimpanzees and dolphins to birds and honeybees he demonstrates how communication among animals can serve as a window into what animals think and feel just as human speech and nonverbal communication tell us most of what we know about the thoughts and feelings of other people Even when they don't communicate about it animals respond with sometimes surprising versatility to new situations for which neither their genes nor their previous experiences have prepared them and Griffin discusses what these behaviors can tell us about animal minds He also reviews the latest research in cognitive neuroscience which has revealed startling similarities in the neural mechanisms underlying brain functioning in both humans and other animals Finally in four chapters greatly expanded for this edition Griffin considers the latest scientific research on animal consciousness pro and con and explores its profound philosophical and ethical implications

Being Human Roger Smith, 2007-09-11 Challenging commonly held biological religious and ethical beliefs internationally well known historian of science Roger Smith boldly argues that human nature is not some thing awaiting discovery but is active in understanding itself According to Smith being human is a self creation made possible through a reflective circle of thought and action with a past and a future and studying this history from a range of perspectives is fundamental to human self understanding Smith s argument brings together historical and contemporary debates concerning materialism and human nature and the relations of the different fields of knowledge He draws on classic writings from across the human sciences touching on sociology anthropology brain sciences history philosophical hermeneutics and critical theory and demonstrates that there is no position outside history for an absolutely objective or eternally valid view of human nature The question what is human does not have and could not possible have one answer Instead there exists a variety of answers for different purposes and there are good reasons for the many conceptions of what it is to be human Smith does not treat human nature as only biological economic or moral but as a multidimensional

subject that should be considered in its proper historical context By understanding this context Smith believes we can come to a truer understanding of ourselves Persuasively and elegantly written *Being Human* takes an important new turn in the philosophical study of being human **Cyberfeminism and Artificial Life** Sarah Kember,2003-08-29 Cyberfeminism and Artificial Life examines the construction manipulation and re definition of life in contemporary technoscientific culture It takes a critical political view of the concept of life as information tracing this through the new biology and the discourse of genomics as well as through the changing discipline of artificial life and its manifestation in art language literature commerce and entertainment From cloning to computer games and incorporating an analysis of hardware software and wetware Sarah Kember extends current understanding by demonstrating the ways in which this relatively marginal field connects with and connects up global networks of information systems Ultimately this book aims to re focus concern on the ethics rather than on the nature of life as it could be The Lure of the Arena Garrett G. Fagan,2011-02-17 Were the Romans who watched brutal gladiatorial games all that different from us This book argues they were not *Psychiatry: An evidence-based text* Bassant Puri,Ian Treasaden,2009-11-27 Succinct user friendly thoroughly referenced and prepared by leading experts in the field this book is the only single textbook you will need to succeed in the Royal College of Psychiatrists MRCPsych and other related higher examinations Chapters follow the structure and syllabus of the examination ensuring that you receive the necessary essen *The Forgetting* David Shenk,2003-01-14 NATIONAL BESTSELLER A powerfully engaging scrupulously researched and deeply empathetic narrative of the history of Alzheimer s disease how it affects us and the search for a cure Afflicting nearly half of all people over the age of 85 Alzheimer s disease kills nearly 100 000 Americans a year as it insidiously robs them of their memory and wreaks havoc on the lives of their loved ones It was once minimized and misunderstood as forgetfulness in the elderly but Alzheimer s is now at the forefront of many medical and scientific agendas for as the world s population ages the disease will touch the lives of virtually everyone David Shenk movingly captures the disease s impact on its victims and their families and he looks back through history explaining how Alzheimer s most likely afflicted such figures as Jonathan Swift Ralph Waldo Emerson and Willem de Kooning The result is a searing and graceful account of Alzheimer s disease offering a sobering compassionate and ultimately encouraging portrait *Life Sciences in Transition* Halldor Stefansson,2002-08-30 These essays grew out of an effort at the EMBL to promote a new form of science communication on the social ethical and political issues that surround rapid change in the life sciences Published in the Journal of Molecular Biology these eighteen essays address the main topics of the future of the biosciences biosciences and basic values genomics and the globalization of biology science miscommunication and reproductive technologies Hot topics such as cloning genomics reproductive technologies health care costs are addressed Key Features Significant to those in the life sciences and social sciences Features an Introduction by Halld r Stef nsson Published in conjunction with the prestigious European Molecular Biology Laboratory EMBL Planting the Impatience K.
