Dobereiner David Dobereiner, 2019-10-15 Nature is endlessly reinventing itself in a constant flux of movement and diversity Yet the advancement of modern civilization has engendered extreme inequality social division and an imbalance between society and nature Our technological proficiency has given our species the illusion of omnipotence in our efforts to build robots more like us we have not noticed how robotic we ourselves have become To deal with this profound crisis we must understand this problem at its roots Could the origins of social domination and ecological exploitation be related Is it possible for us to transform these dynamics and design society in a way that is cognizant of and harmonious with the Earth In this visionary book David Dobereiner lucidly delves into the present urban and ecological impasse and examines the prospects for our future Laced with insights into social and political ecology and written with a lifetime's experience of innovating in ecological design *Organicity* shows that there is still hope to build a more humane egalitarian and sustainable system but it requires a fundamental shift in the way we do civilization At the crossroads of creation and destruction will evolution or entropy triumph
