**The Journals of the Lewis and Clark Expedition: August 30, 1803-August 24, 1804** Meriwether Lewis, 1983-01-01

The journey of the Corps of Discovery under the command of Captains Meriwether Lewis and William Clark across the American West to the Pacific Ocean and back in the years 1804-1806 seems to me to have been our first really American adventure one that also produced our only really American epic The Journals of the Lewis and Clark Expedition now at last available in a superbly edited easily read edition in twelve volumes of an eventual thirteen almost two centuries after the Corps of Discovery set out This important text has not been fully appreciated for what it is because of two centuries of incomplete and inadequate editing All three editions previous to this excellent one from the University of Nebraska were flawed by significant omission Thus my gratitude to the present editor Gary Moulton and his assistant editor Thomas Dunlay for bringing what I believe to be a national epic into plain view at last For almost two hundred years their Lewis and Clark's strong words waited there but not there printed but not read our silent epic But words can wait now the captains' writings have at last spilled out and fully in this regal edition When the Atlas of the Lewis and Clark Expedition appeared in 1983 critics hailed it as a publishing landmark This eagerly awaited second volume of the new Journals of the Lewis and Clark Expedition begins the actual journals of those explorers whose epic expedition still enthalls Americans Instructed by President Jefferson to keep meticulous records bearing on the geography ethnology and natural history of the trans Mississippi West Meriwether Lewis and William Clark and four of their men filled hundreds of notebook pages with observations during their expedition of 1804-6 The result was in is a national treasure a complete look at the Great Plains the Rockies and the Pacific Northwest reported by men who were intelligent and well prepared at a time when almost nothing was known about those regions so newly acquired in the Louisiana Purchase Volume 2 includes Lewis's and Clark's journals for the period from August 1803 when Lewis left Pittsburgh to join Clark farther down the Ohio River to August 1804 when the Corps of Discovery camped near the Vermillion River in present South Dakota The general introduction by Gary E Moulton discusses the history of the expedition the journal keeping methods of Lewis and Clark and the editing and publishing history of the journals from the time of Lewis and Clark's return Superseding the last edition published early in this century the current edition brings together new materials discovered since then It greatly expands and updates the annotation to take account of the most recent scholarship on the many subjects touched on by the journals

added eagerly to their already vast collections during the decades of publication acquiring by gift the great collections of A O Hume on Asian birds and those of Sclater and Salvin and Godwin on Neotropical birds so that the size of the collection nearly tripled between 1874 and 1888 Sharpe originally intended to do all the work himself but others were called in when this became clearly impossible The plates are all of birds not previously illustrated In the decades following its publication this catalogue was universally acclaimed as the most important work on systematic ornithology that has ever been published Zimmer p 96 And even after one hundred years it remains an essential reference for the serious ornithologist as it underpins a great deal of modern bird classification With 387 plates most hand coloured lithographs some chromolithographs by William Hart J G Keulemans Joseph and Peter Smit The Journals of the Lewis and Clark Expedition, 1983 When the Corps of Discovery left the vicinity of St Louis in 1804 to explore the American West they had only sketchy knowledge of the terrain that they were to cross existing maps often contained large blank spaces and wild inaccuracies William Clark painstakingly mapped every mile of the journey drawing from both direct observation and from the reports of Indians and a few fur traders On their return Lewis and Clark directed the execution of new maps detailing with remarkable accuracy the features of the country that they had traversed
