From Living Cells to Dinosaurs Roy A. Gallant, 1986 A clear discussion on how life evolved up to and including the age of dinosaurs

The Mysterious Waves of Living Cells Hubert Rudakemwa, 2014-07-30 In this book Rudakemwa shares with us intriguing questions which lead to thinking about the existence of a new way of communication used by living cells These ideas lead to a new theory that revolutionizes the way we previously conceived the internal organization of living beings Not only this theory is new in its own way but it also brings in many other stunning consequences about the living world as we know it In this book He also goes deep to cover other issues such as a review of the theory of evolution and the origins of human conflicts

The Real Story of Dinosaurs and Dragons Philip J. Senter, 2025-02-11 Are there dinosaurs in the Bible Are dragon legends based on human encounters with fire breathing dinosaurs A vast and ever growing body of literature proclaims that the answer to both these questions is yes The Real Story of Dinosaurs takes readers on a madcap journey through science folklore and anti evolution propaganda to explore the origin and evolution of these ideas and how we know they re wrong The journey begins with the origin of the dragon in ancient myth and continues through the astounding fossil discoveries of more recent times Dr Senter examines a plethora of bizarre claims about dinosaurs and uses knowledge from modern scholarship to set the record straight He also explores proposed mechanisms for fire breathing in dinosaurs and tries them in a court of science Along the way readers are treated to explanations of rocket fuel nuclear power plants carnival fire eating the electric eel s shocking capabilities and what s up a crocodile s nose Written in a playful spirit of discovery The Real Story of Dinosaurs entertains as it promotes evidence based reasoning and illustrates the differences between science and anti evolution hype

On a back road in Saranac Lake New York is Petrova Avenue where a small rock shop owned by the Bristol family was located. As a young boy I remember going to that rock shop every summer when my family traveled to visit my grandparents in Lake Placid. That rock shop had treasures, lots of treasures. There were fossils that were millions of years old and geodes that you could buy and have cut open. The geodes were my favorite. It would take half an hour to cut open those big round grapefruit sized rocks and when they split you could hear a thump inside the oil cutting saw tank. Then they would open the saw lid and you would see what kind of treasure was inside the geode. That was fifty years ago I can still see the sparkling light shining off the oil covered hollow inside and the purple crystals of amethyst that shined back. The geodes with large dark purple amethyst crystals were the most valuable. I still have those same geodes today. Perhaps because of this experience my favorite color became purple and I went on to college and majored in geology. How I wondered as a young boy could anyone be certain that those fossils were indeed millions of years old. Geology teaches us that the world is 4.75 billion years old and that the Grand Canyon represents 1.8 billion years of earth's history with an average depth of over one mile in thickness, six thousand feet. According to <https://www.ocean.washington.edu> it also tells us that the average thickness of land on our planet is 2,755 feet and 75 percent of the surface rocks are sedimentary. <https://digitalatlas.cose.isu.edu> Sedimentary rocks are rocks that have been broken down from other rocks by the action of water. Where did all the water come from to create so many sedimentary rocks that are even found 2,755 feet above sea level. Virtually all scientific sources agree that if all the ice on the planet melted, North Pole, South Pole, glaciers, etc., the ocean would only rise 200-230 feet above sea level. So where did all the water come from to make those sedimentary rocks that are over thousands of feet above sea level. Science does not have an answer. Did you know if you apply common rates of ocean sedimentation to how long it would take the sedimentary layers in the Grand Canyon to form, it will only take 5.4 million years or less to form the sedimentary layers of the Grand Canyon instead of 1.8 billion years. There are very pronounced errors in the theory of evolution that can be proven with simple math and common sense explanations. That is what this book is about: common sense rebuttals of what has become a worldwide philosophy: evolution. There are simple answers to the questions of why the earth is not extremely old and where all the water came from that formed sedimentary rocks at such high elevations above sea level. These answers are not taught in our school classrooms. In this book I attempt to write from a less complicated stance, explaining in layman's terms truths that refute the theory of evolution.
