From Marx To Lenin An Evaluation Of Marx's Responsibility For Soviet Authoritarianism:

From Marx to Lenin David W. Lovell, 1984-07-19 This study is a contribution to the debate begun just after the October Revolution concerning the relationship between Marx's project and Soviet society. It focuses however only on the political aspects of the matter to what extent was early Soviet authoritarianism the necessary outcome of Marx's works. Since Lenin's practice and theory largely determined and justified the early political character of the Soviet state, we may ask whether Lenin was implementing Marx's project or a project of his own design. Lenin, influenced by debates within Social Democracy and by the experience of the Russian revolutionary tradition, used a one-sided interpretation of Marx's work to build and defend a transition which was fundamentally authoritarian. Marx was not causally responsible for the theoretical foundation of Soviet authoritarianism.

From Marx to Lenin: An Evaluation of Marx's Responsibility for Soviet Authoritarianism David W. Lovell (1956), 2009 This study is a contribution to the debate concerning the relationship between Marx's project and Soviet society. Lenin, influenced by debates within Social Democracy and by the experience of the Russian revolutionary tradition, used a one-sided interpretation of Marx's work to build and defend a transition which was fundamentally authoritarian. Marx was not causally responsible for the theoretical foundation of Soviet authoritarianism.

Stalinism and the Politics of Mobilization David Priestland, 2007-02-01 Stalinism and the Politics of Mobilization offers a new interpretation of Bolshevik ideology, examines its relationship with Soviet politics between 1917 and 1939, and sheds new light on the origins of the political violence of the late 1930s. While it challenges older views that the Stalinist system and the Terror were the product of a coherent Marxist-Leninist blueprint imposed by a group of committed ideologues, it argues that ideas mattered in Bolshevik politics and that there are strong continuities between the politics of the revolutionary period and those of the 1930s. By exploring divisions within the party over several issues, including class, the relations between elites and masses, and economic policy, David Priestland shows how a number of ideological trends emerged within Bolshevik politics and how they were related to political and economic interests and strategies. He also argues that central to the launching of the Terror was the leadership's commitment to a strategy of mobilization and to a view of politics that ultimately derived from the left Bolshevism of the revolutionary period.

Lenin's Terror James Ryan, 2012 This book explores the development of Lenin's thinking on violence throughout his career, from the last years of the Tsarist regime in Russia through to the 1920s and the New Economic Policy, and provides an important assessment of the significance of ideological factors for understanding Soviet state violence as directed by the Bolshevik leadership during its first years in power. It highlights the impact of the First World War, in particular its place in Bolshevik discourse as a source of legitimating Soviet state violence after 1917, and explains the evolution of Bolshevik dictatorship over the half-decade during which Lenin led the revolutionary state. It examines the militant nature of the Leninist worldview, Lenin's conception of the revolutionary state, the evolution of his understanding of dictatorship of the proletariat, and his version of just war. The book argues that ideology can be

considered primarily important for understanding the violent and dictatorial nature of the early Soviet state at least when focused on the party elite but it is also clear that ideology cannot be understood in a contextual vacuum The oppressive nature of Tsarist rule the bloodiness of the First World War and the vulnerability of the early Soviet state as it struggled to survive against foreign and domestic opponents were of crucial significance The book sets Lenin s thinking on violence within the wider context of a violent world **The Political Economy of Soviet Socialism: the Formative Years, 1918-1928**

Peter J. Boettke,2013-03-14 This book presents a narrative of one of the more interesting utopian experiments in comparative political and economic history the first decade of the Soviet experience with socialism 1918 1928 Though historical and textual analysis the book s goal is to render this experience intelligible to get at the meaning of the Soviet experience with socialism for comparative political economy today The book examines the texts of Lenin Bukharin and other revolutionaries as well as the interpretations of contemporary historians of the revolution and the writings of more recent interpreters of Soviet political and economic history Arguing that the first three years of the Bolshevik regime 1918 1921 constitute an attempt to carry out the Marxian ideal of comprehensive central planning and that the disastrous results which all commentators agree occurred were the inevitable outcome of this Marxian ideal coming into conflict with the economic reality of the coordination problem that all economic systems face the book draws clear conclusions and elucidates the air of mystery that often surrounds the subject Offering a radical challenge to contemporary comparative political economy at the level of high theory applied research and public policy this book is appropriate for students and scholars interested in Marxism economic history political economy and Austrian economics **Soviet Communists in Power R.**

Gill,2002-07-18 New and challenging perspectives on Soviet political development from 1917 to 1941 **Stalinism** Graeme Gill,2016-01-07 Drawing

on research based on access to the recently opened Soviet archives this new edition provides a valuable thematic account of the nature of Stalinism The author surveys the arguments about the origins of the Stalinist phenomenon and discusses the way in which the different faces of Stalinism economic social cultural and political changed over time Gill concludes that the dramatic fall of the USSR was connected to the nature of Stalinism

Revolution and Terror Graeme Gill,2023-11-30 This book is a study of the relationship between revolution and terror Historically many have claimed that revolution inevitably devolves into terror best reflected in the way in which after coming to power the revolutionary elite turns on itself and one section of it uses terrorist means to eliminate another section This thesis originally stemmed from the French revolution but has more recently also been applied to the Russian and the Chinese revolutions Graeme Gill argues that in order to understand the relationship between revolution and terror it is necessary to distinguish between different types of terror There are three such types revolutionary terror in which the aim is to destroy enemies and thereby consolidate the regime transformational terror designed to drive the politico socio economic transformation of society that is the purpose of the great revolutions and inverted terror which is when terror is turned against part of the elite and regime more broadly The analysis explains how these different types of terror are related to the revolutionary seizure of power showing that revolutionary and transformational terror are organically connected to revolution while for inverted terror the connection is mediated through the leader The argument is prosecuted through detailed analysis of the French Russian and Chinese revolutions The study ends by assessing the contemporary salience of the lessons of the great revolutions in the light of the low level of violence in the negotiated revolutions of 1989

The Red Flag David Priestland, 2016-05-03 The best and the most accessible one volume history of communism now available A far reaching vividly written account Foreign Affairs In *The Red Flag* Oxford professor David Priestland tells the epic story of a movement that has taken root in dozens of countries across two hundred years from its birth after the French Revolution to its ideological maturity in nineteenth century Germany to its rise to dominance and subsequent fall in the twentieth century Beginning with the first modern Communists in the age of Robespierre Priestland examines the motives of thinkers and leaders including Marx Engels Lenin Stalin Castro Che Guevara Mao Ho Chi Minh Gorbachev and many others Priestland also shows how Communism in all its varieties appealed to different societies for different reasons in some as a response to inequalities and in others more out of a desire to catch up with the West But

paradoxically while destroying one web of inequality Communist leaders were simultaneously weaving another It was this dynamic together with widespread economic failure and an escalating loss of faith in the system that ultimately destroyed Soviet Communism itself At a time when global capitalism is in crisis and powerful new political forces have arisen to confront Western democracy The Red Flag is essential reading if we are to apply the lessons of the past to navigating the future Detailed and scholarly but written in lively prose this is a rich satisfying account of the most successful utopian political movement in history Publishers Weekly starred review *Political Thought From Machiavelli to Stalin* E. A. Rees,2004-03-12 This is the first book in English to explore the relationship between Stalin s ideas and methods and the practices advocated by Machiavelli and those associated with Machiavellian politics It advances the concept of revolutionary Machiavellism as a way of understanding a particular strand of revolutionary thought from the Jacobins through to Leninism and Stalinism By providing a wide ranging survey of European political thought in the Nineteenth and early Twentieth century E A Rees locates the Bolshevik tradition within the wider European tradition *Marx, Engels and Liberal Democracy* Michael Levin,1989-02-09 A study investigating how the founders of Marxism came to terms with the emergence of liberal democracy as a political system It examines in language without jargon how they defined democracy and how they evaluated the liberal constitutional state by placing their ideas in historical context *Revolutionary Europe* Gavin Murray-Miller,2020-02-06 CHOICE Outstanding Academic Title 2021 Revolutionary Europe is an original examination of radical political movements during Europe s long 19th century It employs both national and transnational contexts incorporating new debates in Atlantic history empire studies and cultural history to give a comprehensive narrative of the period from 1775 to 1922 Rather than assessing revolution as a purely theoretical socially driven force or a structural phenomenon the book presents revolution as a process of community building and cultural identification born from instances of acute social and political crisis Taking into account various moments of political upheaval during the 19th century including the French Russian and 1848 revolutions it explores the ways in which political actors attempted to construct new definitions of sovereignty and social unity in a period characterized by vast social economic and governmental change In a wide ranging text that covers Britain and much of continental Europe in detail as well as reaching out to the Americas and Atlantic and Mediterranean Worlds Gavin Murray Miller provides an authoritative transnational study of revolution in the 19th century age of high nationalism **Calculation and Coordination** Peter J Boettke,2000-11-23 This collection of essays from one of the major Austrian economists working in the world today brings together in one place some of his key writings on a variety of economic issues **Russia and Its Constitution** Gordon B.
