Mystic in the New World: Marie de l'Incarnation (1599-1672) Anya Mali, 2021-11-01 As one of the first female missionaries to the New World and the author of a classic mystical autobiography Marie de l Incarnation has long been seen as an exemplary type reflecting the mood and aims of the Catholic Reformation In contrast to studies which portray her against the backdrop of religious trends in Catholic Reformation France this book argues that the New France wilderness was the crucial context for the formation of her spiritual identity Marie de l Incarnation brought her traditional notions to bear on her encounter with the Amerindians but was soon compelled to adjust her views on the natives and the nature of religious experience A close textual analysis of her writings makes it clear that her mysticism was informed by the images of her tradition but also gave new meaning to old concepts Beyond its relevance for those interested in this mystic the book addresses the broader issue of shifting attitudes and boundaries in early modern religious life and demonstrates the need for more variegated typologies of mystical experience in studies on spiritual literature

Religion and Transhumanism Calvin Mercer, Tracy J. Trothen, 2014-11-17 Should technology be used to improve human faculties such as cognition and longevity This thought provoking dialogue between transhumanism and religion examines enhancement technologies that could radically alter the human species Transhumanism or human enhancement is an intellectual and cultural movement that advocates the use of emerging technologies to change human traits Although they may sound like science fiction the possibilities suggested by transhumanism are very real and the questions they raise have no easy answers If these enhancements especially major ones like the indefinite extension of

healthy human life become widely available they would arguably have a more radical impact on humankind than any other development in history This book comprises essays that explore transhumanism and the issues that surround it addressing numerous fascinating questions posed by scholars of religion from various traditions How will immortality or extreme longevity change our religious beliefs and practices How might pharmaceuticals enhance spiritual experiences Will post human technologies be available to all persons or will a superior post human race arise to dominate the human species The discussions are as intriguing as the future they suggest

arrive at a new level of interest introspection or action that has been stirred by the very creativity used to keep boredom away The relationship between boredom and creativity is far from accidental Creative minds are often stimulated by boredom regarding it as a brain rest until the next great idea looms on the horizon of the otherwise unoccupied mind from Chapter 10 Boredom is a crisis of our age In religious terms boredom is sapping spirituality of its mystical and wholesome benefits slowly corroding our ability to recognize blessing and beauty in our lives to experience wonder and awe What happens when our need for constant newness minimizes our interest in prayer learning and the mysteries of nature This intriguing look at spiritual boredom helps you understand just what this condition is particularly as it relates to Judaism and what the absence of inspiration means to the present and future of the Jewish tradition Drawing insights from psychology philosophy and theology as well as ancient Jewish texts Dr Erica Brown explores the many ways boredom manifests itself within Judaism in the community classroom and synagogue and shows its potentially powerful cultural impact on a faith structure that advises sanctifying time not merely passing it
