

Managing Post-Conflict Recovery in Africa: An Overview

The papers in this volume deal with some aspects of the process of development in post-conflict countries in Sub-Saharan Africa, namely, policy framework for transiting from post-conflict to sustainable development; mechanisms for financing post-conflict recovery; poverty reduction strategies during post-conflict recovery and distinctive features of post-conflict recovery strategies. It is remarkable that even though the four papers were independently written, three common themes run through them. The first is that post-conflict countries, in order to transit from recovery to sustainable development, need a planning framework with a fairly long-time horizon and an overarching objective of poverty reduction. The second is that economic and social policy-making in such countries is expected to be distinct from that usually undertaken in non-conflict countries, thus signalling the need for each country, given its circumstances, to articulate policy benchmarks that may, or may not, overlap with those proposed by International Financial Institutions (IFIs) and donors. The third major is the need for high volumes of aid flows to these countries; a controversial issue in the specialised literature on the effectiveness of aid. All of these major themes open up a vast area of research especially research based on country case studies.

From Conflict to Recovery in Africa Tony Addison, 2003-02-13 Revitalizing private sectors 4 Transforming states
Conclusions For a list of contributions go to the full text area of this record From Conflict to Recovery in Africa Tony Addison, 2014 Establishing peace and reconstructing Africa's war damaged economies are urgent challenges For Africa to recover communities must reconstruct private sectors must revitalize and states must transform themselves Thus unless communities rebuild and strengthen their livelihoods neither reconstruction nor growth can be poverty reducing But communities cannot prosper unless private investment recreates markets and generates more employment And neither communities nor entrepreneurs can realise their potential without a development state one that is democratically accountable and dedicated to poverty reducing development The international community can do much to assist through more aid debt relief and peacekeeping but ultimately the future lies in the hands of Africans themselves *Africa's Recovery from Conflict* Tony Addison, 2014 This policy brief summarizes the results of a UNU WIDER project on war and reconstruction in Africa directed by Tony Addison which is now published as *From Conflict to Recovery in Africa* As this study makes clear peace is often elusive and economic policy can play a major role in supporting the efforts of those working at the national and international levels to build peace Above all it is crucial to focus post conflict policies on the needs of the poor so that recovery is broad based in its benefits and does not simply benefit a narrow elite Urban Recovery Howayda Al-Harithy, 2021-05-19 This book calls for re conceptualising urban recovery by exploring the intersection of reconstruction and displacement in volatile contexts in the Global South It explores the spatial social artistic and political conditions that promote urban recovery Reconstruction and displacement have often been studied independently as two different processes of physical recovery and human migration towards safety and shelter It is hoped that by intersecting or even bridging reconstruction with displacement we can cross fertilize and exploit both discourses to reach a greater understanding of the notion of urban recovery as a holistic and multi layered process This book brings multidisciplinary perspectives into conversation with each other to look beyond the conflict related displacement and reconstruction and into the greater processes of crises and recovery It uses empirical research to examine how trauma crisis and recovery overlap coexist collide and redefine each other The core exploration of this edited collection is to understand how the oppositional framing of destruction versus reconstruction and place making versus displacement can be disrupted how displacement is spatialized and how reconstruction is extended to the displaced people rebuilding their lives environments and memories in new locations In the process displacement is framed as agency the displaced as social capital post conflict urban environments as archives and reconstructions as socio spatial practices With local and international insights from scholars across disciplines this book will appeal to academics and students of urban studies architecture and social sciences as well as those involved in the process of urban recovery **Professional Social Work in East Africa** Helmut Spitzer, M.
