**The Coalitions Against Napoleon** William Nester, 2023-06-30 Britain alone could not hope to defeat the might of Napoleonic France which through enforced conscription had become a nation in arms But British leaders had a long history of forging alliances to counter their rivals and when revolution ravaged France in 1793 and a levée en masse raised a huge patriotic army it was through a coalition of monarchies that French ambitions were restrained a coalition made possible by British gold and British industry When Napoleon seized the reins of power in France he too introduced conscription and once again it was a succession of British led and funded coalitions which eventually brought Napoleon to his knees During the years 1793 to 1815 the British Government formed and underwrote seven coalitions that cost Britain 1 657 854 518 as the national debt tripled from 290 000 000 to 860 000 000 Of that British subsidies to around thirty allies amounted to 65 830 228 along with staggering amounts of war supplies mass produced by British factories and shipped to allies Britain's leading role in Europe did not end with Waterloo Immediately following the Sixth Coalition and amidst the Seventh Coalition Britain constructed with the other great powers a security system of cooperation and consultation called the Concert of Europe that prevented a serious war among them for two generations Britain's power to underwrite those coalitions came from a related series of revolutions agrarian mercantile financial technological manufacturing cultural and political that developed over the proceeding century For many reasons that happened in Britain and not elsewhere Of them cultural values may be most crucial Constraints were fewer and incentives greater for enterprising Britons to invest invent buy and sell in ways that

enriched themselves and their nation more than elsewhere During the eighteenth century Britain's leaders mastered a virtuous power cycle of victorious wars expanding production captured territories and markets and more income During a speech before Congress in December 1940 President Franklin D Roosevelt called on Americans to be an arsenal of democracy to aid Britain and other countries threatened by the imperialistic fascist powers Britain played exactly the same role during the Napoleonic era The Coalitions Against Napoleon explores how Britain developed and asserted the financial manufacturing and military power to achieve that goal *The Labouring Classes in Early Industrial England, 1750-1850* John Rule, 2014-01-21 This is the most comprehensive and up to date synthesis of current research on the social conditions experiences and reactions of working people during the period 1750-1850 *Church and State in Modern Britain 1700-1850* Richard Brown, 2002-01-04 In this the second part of his history of the Industrial Revolution Richard Brown examines the political and religious developments which took place in Britain between the 1780s and 1840s in terms of the aristocratic elite and through the expression of alternative radical ideologies Opening with a discussion of the nature of history and of Britain in 1700 it goes on to consider Britain's foreign policy the emergence of the modern state and the mid century crisis of the 1840s Unlike many previous works it emphasises British not just English history It is this diversity of experience and the focus on continuity as well as change women as well as men that makes this a distinctive text Students will also find the theoretical foundations of historical narrative and analysis clearly explained **The Cambridge History of Capitalism: Volume 1, The Rise of Capitalism: From Ancient Origins to 1848** Larry Neal, Jeffrey G. Williamson, 2014-01-23 The first volume of The Cambridge History of Capitalism provides a comprehensive account of the evolution of capitalism from its earliest beginnings Starting with its distant origins in ancient Babylon successive chapters trace progression up to the Promised Land of capitalism in America Adopting a wide geographical coverage and comparative perspective the international team of authors discuss the contributions of Greek Roman and Asian civilizations to the development of capitalism as well as the Chinese Indian and Arab empires They determine what features of modern capitalism were present at each time and place and why the various precursors of capitalism did not survive Looking at the eventual success of medieval Europe and the examples of city states in northern Italy and the Low Countries the authors address how British mercantilism led to European imitations and American successes and ultimately how capitalism became global *An Economic History of London 1800-1914* Professor Michael Ball, David T Sunderland, 2001-04-26 This is the first comprehensive survey of the economic development of the world's first great industrial metropolis Modern theories of urban economics are used to shed new light on the process of change in the city *The British National Bibliography* Arthur James Wells, 1994 Production and Consumption in English Households 1600-1750 Darron Dean, Andrew Hann, Mark Overton, Jane Whittle, 2004-08-02 This economic social and cultural analysis of the nature and variety of production and consumption activities in households in Kent and Cornwall yields important new insights on the transition to capitalism in

**British Business History, 1720-1994** J. F. Wilson, 1995-10-15 This is the first textbook that comprehensively covers the three centuries of British business history from 1720 to the present day Wilson argues that company culture has been the most important component in the evolution of business organisations and management practices The influence of business culture on firms structure sources of finance and the background and training of senior managers is investigated to show its pivotal importance in determining business performance     *A Comparative History of Commerce and Industry, Volume II* David E. McNabb, 2016-01-26 A Comparative History of Commerce and Industry Volume II offers a subjective review of how the cultural social and economic institutions of commerce and industry evolved in industrialized nations to produce the institution we now know as business enterprise     **Early Trade Unionism** Malcolm Chase, 2017-07-05 Once the heartland of British labour history trade unionism has been marginalised in much recent scholarship In a critical survey from the earliest times to the nineteenth century this book argues for its reinstatement Trade unionism is shown to be both intrinsically important and to provide a window onto the broader historical landscape the evolution of trade union principles and practices is traced from the seventeenth century to mid Victorian times Underpinning this survey is an explanation of labour organisation that reaches back to the fourteenth century Throughout the emphasis is on trade union mentality and ideology rather than on institutional history There is a critical focus on the politics of gender on the demarcation of skill and on the role of the state in labour issues New insight is provided on the long debated question of trade unions contribution to social and political unrest from the era of the French Revolution through to Chartism

Longman Atlas of Modern British History Chris Cook, John Stevenson, 1978     *Infanticide* Rachel Dixon, 2023-02-02 Infanticide examines medical expert evidence in infanticide cases focusing specifically on the shifting notion of certainty in medical testimony Beginning in the Early Modern period and concluding in the mid twentieth century it considers how courts determined whether an infant died from natural causes or other reasons including violence The book explores expert

evidence in cases of infanticide and examines the extent of certainty created by medical specialists who founded their testimony on anatomical exploration and science As the book progresses it becomes clear that medical specialists were unable to scientifically establish cause of death and in doing so conveyed uncertainty in court proceedings Rather than being regarded as a professional failing Dixon argues that the uncertainty created by medical specialists redirected the outcomes of infanticide cases The combination of uncertainty and the changing perceptions of infanticidal women by the court lead juries to find infanticidal women not guilty of a capital offence in many cases This book will be of great interest to students and scholars of Criminology Law and History
