From Mao To Market:

From Mao to Market Andrew H. Wedeman, 2003-07-10 Andrew Wedeman argues that China succeeded in moving from a Maoist command economy to a market economy because the central government failed to prevent local governments from forcing prices to market levels. Having partially decontrolled the economy in the early 1980s, economic reformers balked at price reform, opting instead for a hybrid system wherein commodities had two prices: one fixed and one floating. Depressed fixed prices led to resource wars as localities battled each other for control over undervalued commodities, while inflated consumer goods prices fuelled a headlong investment boom that saturated markets and led to the erection of import barriers. Although local rent seeking and protectionism appeared to carve up the economy, in reality they had not only pushed prices to market levels and cleared the way for sweeping reforms in the 1980s, they had also pushed China past the pitfalls of reform that entrapped other socialist economies. The Changing Face of China John Gittings, 2006-07-06

Where is China heading in the 21st century? Can its Communist Party survive, or is it being challenged by growing inequality and unrest? Will the US and China cooperate or compete in a dangerous future? Will China's economic boom be brought to a halt by environmental catastrophe? In this highly readable account, John Gittings provides the essential information to help answer these vital questions for the world. In the 60 years since Mao Zedong took the road to victory, China has undergone not one but two revolutions. The first swept away the old corrupt society and sought to build a spotless new socialism behind closed doors; the second, since Mao's death, has focused on an economic agenda which accepts the goals of global capitalism. From Mao to the global market, Gittings charts this complex but epic tale and concludes with some hard questions for the future.

From Mao to Market Robin Porter, 2011 Drawing on decades of research and teaching on China, Robin Porter presents a nuanced view of the country's modern evolution and its myriad historical influences. Porter has a wealth of practical experience with China, having first visited the country during the Cultural Revolution and having worked as an editor at the Xinhua News Agency during the 1970s. In this volume, he explicitly accounts for the factors that gave rise to China's current trends and behaviors, offering both scholars and newcomers a rich portrait of an unpredictable though formidable world power. Porter begins with China's social and political development from earliest times to the modern period. He concludes with the country today, then steps back to assess the events that have most determined China's evolution. He concentrates on the role played by politics and culture in conditioning every aspect of Chinese life. His analysis considers the country's Confucian heritage, orthodoxy in ideology and law, political command structures, technological innovation, enterprise management, public policy, and private goals, and the prospects for democracy. With personal insight and privileged perspective, Porter clarifies a number of myths and mysteries about modern China and evaluates the implications of its expansion in the balance of world power. He provides crucial context for the China dimension that has become so central to discussions of national and international policy. **From Mao to market** Joseph Tse-Hei Lee, 2011 China's Architecture

Kelly, 2021-05-11 Chinese Communists have long embraced capitalism for various reasons In the 1930s Communists made deals with foreign capitalists to finance the revolution Mao continued to promote trade after 1949 Jason Kelly shows how global deals kept China embedded in markets and their norms laying the groundwork for the capitalist reforms of the 1980s

Market in State Yongnian Zheng, Yanjie Huang, 2018-09-06 Focusing on the evolving relations between the state and market in the post Mao reform era Yongnian Zheng and Yanjie Huang present a theory of Chinese capitalism by identifying and analyzing three layers of the market system in the contemporary Chinese economy These are namely a free market economy at the bottom state capitalism at the top and a middle ground in between By examining Chinese economic practices against the dominant schools of Western political economy and classical Chinese economic thoughts the authors set out the analytical framework of market in state to conceptualize the market not as an autonomous self regulating order but part and parcel of a state centered order Zheng and Huang show how state political principles are dominant over market economic principles in China's economy As the Chinese economy continues to grow and globalize its internal balance will likely have a large impact upon economies across the world
