From Midwives To Medicine The Birth Of American Gynecology:

From Midwives to Medicine Deborah Kuhn McGregor, 1998-01-01 Examines the development of modern medical treatment of women and the related history of women's health in the mid 1800s. It looks not only at the medical figures who devised and practiced the innovative therapies but also at the history of the patient experience in the development and the professionalization of a medical specialty. In exploring the controversial career of J. Marion Sims, the father of gynecology and the history of the Woman's Hospital of the State of New York, the book chronicles the emergence of a practice involving previously untried medical techniques and the use of experimentation on patients according to a social hierarchy based on race and sex. Illustrated.

Mary Putnam Jacobi and the Politics of Medicine in Nineteenth-Century America Carla Bittel, 2012-06-01 In the late nineteenth century, as Americans debated the woman question, a battle over the meaning of biology arose in the medical profession. Some medical men claimed that women were naturally weak, that education would make them physically ill, and that women physicians endangered the profession. Mary Putnam Jacobi (1842-1906), a physician from New York, worked to prove them wrong and argued that social restrictions, not biology, threatened female health. *Mary Putnam Jacobi and the Politics of Medicine in Nineteenth-Century America* is the first full-length biography of Mary Putnam Jacobi, the most significant woman physician of her era and an outspoken advocate for women's rights. Jacobi rose to national prominence in the 1870s and went on to practice medicine, teach, and conduct research for over three decades. She campaigned for co-education, professional opportunities, labor reform, and suffrage, the most important women's rights issues of her day. Downplaying gender differences, she used the laboratory to prove that women were biologically capable of working, learning, and voting. Science, she believed, held the key to promoting and producing gender equality. Carla Bittel's biography of Jacobi offers a piercing view of the role of science in nineteenth-century women's rights movements and provides historical perspective on continuing debates about gender and science today.

Medical Apartheid Harriet A. Washington, 2008-01-08 NATIONAL BOOK CRITICS CIRCLE AWARD WINNER The first full history of Black America's shocking mistreatment as unwilling and unwitting experimental subjects at the hands of the medical establishment. No one concerned with issues of public health and racial justice can afford not to read this masterful book. Washington has unearthed a shocking amount of information and shaped it into a riveting, carefully documented book. *New York Times*: "From the era of slavery to the present day, starting with the earliest encounters between Black Americans and Western medical researchers and the racist pseudoscience that resulted, *Medical Apartheid* details the ways both slaves and freedmen were used in hospitals for experiments conducted without their knowledge, a tradition that continues today within some black populations. It reveals how Blacks have historically been prey to grave robbing as well as unauthorized autopsies and dissections. Moving into the twentieth century, it shows how the pseudoscience of eugenics and social Darwinism was used to justify experimental exploitation and shoddy medical treatment of Blacks. Shocking new details about the government's notorious Tuskegee

experiment are revealed as are similar less well known medical atrocities conducted by the government the armed forces prisons and private institutions The product of years of prodigious research into medical journals and experimental reports long undisturbed Medical Apartheid reveals the hidden underbelly of scientific research and makes possible for the first time an understanding of the roots of the African American health deficit At last it provides the fullest possible context for comprehending the behavioral fallout that has caused Black Americans to view researchers and indeed the whole medical establishment with such deep distrust

The Doctors Blackwell: How Two Pioneering Sisters Brought Medicine to Women and Women to Medicine Janice P. Nimura, 2021-01-19 New York Times Bestseller Finalist for the 2022 Pulitzer Prize in Biography Janice P. Nimura has resurrected Elizabeth and Emily Blackwell in all their feisty thrilling trailblazing splendor Stacy Schiff Elizabeth Blackwell believed from an early age that she was destined for a mission beyond the scope of ordinary womanhood Though the world at first recoiled at the notion of a woman studying medicine her intelligence and intensity ultimately won her the acceptance of the male medical establishment In 1849 she became the first woman in America to receive an M.D. She was soon joined in her iconic achievement by her younger sister Emily who was actually the more brilliant physician Exploring the sisters allies enemies and enduring partnership Janice P. Nimura presents a story of trial and triumph Together the Blackwells founded the New York Infirmary for Indigent Women and Children the first hospital staffed entirely by women Both sisters were tenacious and visionary but their convictions did not always align with the emergence of women's rights or with each other From Bristol Paris and Edinburgh to the rising cities of antebellum America this richly researched new biography celebrates two complicated

pioneers who exploded the limits of possibility for women in medicine As Elizabeth herself predicted a hundred years hence women will not be what they are now **Deliver Me from Pain** Jacqueline H. Wolf, 2012-04-01 Despite today's historically low maternal and infant mortality rates in the United States labor continues to evoke fear among American women Rather than embrace the natural childbirth methods promoted in the 1970s most women welcome epidural anesthesia and even Cesarean deliveries In **Deliver Me from Pain** Jacqueline H Wolf asks how a treatment such as obstetric anesthesia even when it historically posed serious risk to mothers and newborns paradoxically came to assuage women's anxiety about birth Each chapter begins with the story of a birth dramatically illustrating the unique practices of the era being examined **Deliver Me from Pain** covers the development and use of anesthesia from ether and chloroform in the mid nineteenth century to amniotics barbiturates narcotics opioids tranquilizers saddle blocks spinals and gas during the mid twentieth century to epidural anesthesia today Labor pain is not merely a physiological response but a phenomenon that mothers and physicians perceive through a historical social and cultural lens Wolf examines these influences and argues that medical and lay views of labor pain and the concomitant acceptance of obstetric anesthesia have had a ripple effect creating the conditions for acceptance of other often unnecessary and sometimes risky obstetric treatments forceps the chemical induction and augmentation of labor episiotomy electronic fetal monitoring and Cesarean section As American women make decisions about anesthesia today **Deliver Me from Pain** offers them insight into how women made this choice in the past and why each generation of mothers has made dramatically different decisions **Charting the Plantation Landscape from Natchez to New Orleans** Laura Kilcer VanHuss, 2021-05-05 **Charting the Plantation Landscape from Natchez to New Orleans** examines the hidden histories behind one of the nineteenth century South's most famous maps Norman's Chart of the Lower Mississippi River created by surveyor Marie Adrien Persac before the Civil War and used for decades to guide the pilots of river vessels Beyond its purely cartographic function Persac's map depicted a world of accomplishment and prosperity while concealing the enslaved and exploited laborers whose work powered the plantations Persac drew In this collection contributors from a variety of disciplines consider the histories that Persac's map omitted exploring plantations not as sites of ease and plenty but as complex legal political and medical landscapes Essays by Laura Ewen Blokker and Suzanne Turner consider the built and designed landscapes of plantations as they were structured by the logics and logistics of both slavery and the effort to present a facade of serenity and wealth William Horne and Charles D Chamberlain III delve into the political activity of formerly enslaved people and slaveholders respectively while Christopher Willoughby explores the ways the plantation health system was defined by the agro industrial environment Jochen Wierich examines artistic depictions of plantations from the antebellum years through the twentieth century and Christopher Morris uses the famed Uncle Sam Plantation to explain how plantations have been memorialized remembered and preserved With keen insight into the human cost of the idealized version of the agrarian South depicted in Persac's map **Charting the Plantation Landscape** encourages
