Learning: Gaps and Transitions on the Way from Novice to Expert Henny P.A. Boshuizen,Rainer Bromme,Hans Gruber,2006-04-11 About the Book Series The idea for the Book Series Innovation and Change in Professional Education ICPE was born in 1996 While working on another publication in this area we noticed that professional educators faced similar problems without even knowing from each other It was this observation that resulted in examining the possibilities for a new publication platform about professional education with input from different professions We wanted to develop a publication source that would bring together educators and researchers to exchange ideas and knowledge about theory research and professional practice But we were not only striving for a book series informing readers about important themes in the professions A second goal was to focus on processes of change and innovation We were heavily involved in innovations going on in our institutions and were convinced that a better understanding was needed in a wide range of issues critically important to the future of professional education It was our belief that scholarly publications about innovation processes may support fundamental change in professional education ICPE reflects our view that professional education deserves such a publication platform It aims to approach critical questions of educational innovations and to examine dynamics of educational change in various professional domains in the context of innovation processes The books will include contributions from frontline practitioners leading researchers or distinguished scholars in professional education delivering reports of empirical or theoretical research reviews interpretations of evaluation studies or descriptions of innovative approaches From
Novice to Expert Patricia E. Understanding Decision-making Processes in Airline Operations
Control Peter J. Bruce, 2016-02-17 Previous studies conducted within the aviation industry have examined a multitude of crucial aspects such as policy airline service quality and revenue management An extensive body of literature has also recognised the importance of decision making in aviation with the focus predominantly on pilots and air traffic controllers Understanding Decision Making Processes in Airline Operations Control focuses instead on an area largely overlooked an airline s Operations Control Centre OCC This serves as the nerve centre of the airline and is responsible for decision making with respect to operational control of an airline s daily schedules The environment within an OCC is extremely intense and a key role of controllers is to make decisions that facilitate the airline s recovery from frequent highly complex and often multiple disruptions As such decision making in this domain is critical to minimise the operational commercial and financial impact resulting from disruptions The book examines many aspects of individual decision making in airline operations and addresses the deficiencies found by presenting to the reader an examination of the relationships among situation awareness information completeness experience expertise decision considerations and decision alternatives in OCCs The text utilises a multiple case study approach and proposes a number of relevant and important implications for OCC management Practical outcomes highlight the need for enhancing training programs enabling existing controllers to readily identify and classify elements of situation awareness and decision considerations as a means of improving the decision making process They also

draw attention to the need for airline OCCs to understand the extent to which industry experience and expertise of controllers is important in the selection of future staff
