From A Transcendental Semiotic Point Of View:

From a Transcendental-semiotic Point of View Karl-Otto Apel,1998 Collected together in English Karl Otto Apel's work covers a spectrum of philosophical issues This work is aimed at academics and students concerned with post analytical philosophy epistemology history of science Heidegger's fundamental ontology current debates about transcendental modes of argument second generation Frankfurt School thinkers and American pragmatists It is also aimed at those interested in reformulations of Kantian themes and redefinitions of older ideas within the linguistic paradigm as well as those who being familiar with Habermas work wish to know more about the controversies and debates within the circle of the Frankfurt School itself

Toward a Metaphysics of Culture Joseph Margolis,2016-03-02 Toward a Metaphysics of Culture provides an initial minimal and original analysis of the concept of uniquely enlanguaged cultures of the human world and of the distinctive metaphysical features of whatever belongs to the things of that world preeminently persons language actions artworks products history practices institutions and norms Emphasis is placed on the artifactual and hybrid nature of persons naturalistic and post Darwinian evolutionary considerations and the bearing of the account on a range of disputed inquiries largely centered on the relationship between physical nature and human culture and between the natural and human sciences The schema offered lays a foundation for a closer analysis of the human mind cognition interpretation nomologicality normativity intentionality realism and related matters The central thesis advances the heterodox notion congruent with post Darwinian studies in paleoanthropology that the human person is a natural artifact a functional transform of the primate members of Homo sapiens by way of a complexly intertwined biological and encultured evolution primarily dependent on the invention transmission and mastery of true language and the novel hybrid abilities that that makes possible The emergence of persons is taken to be the obverse side of the mastery of language itself

What is Philosophy? C. P. Ragland,Sarah Heidt,Sarah L. Heidt,2001-01-01 In this stimulating book six leading philosophers Karl Otto Apel Robert Brandom Karsten Harries Martha Nussbaum Barry Stroud and Allen Wood consider the nature of philosophy Although each of them has a unique perspective they all seem to agree that philosophy seeks to uncover hidden assumptions and concepts in order to expose them to critical scrutiny It is thus entirely fitting that philosophers should examine their own assumptions about the nature of their discipline As they delve into the nature of philosophy the authors address many fascinating subjects what makes philosophy different from natural science religion and other branches of the humanities whether philosophy can contribute to political transformation and if so how whether there can ever be an end of philosophy and more The editors introduction ties together the contributors diverse perspectives by noting common themes similarities and differences

Deconstruction and the 'Unfinished Project of Modernity' Christopher Norris,2020-11-25 Through a close engagement with some key thinkers Norris argues that deconstruction is part of the unfinished project of modernity a project whose interest and values it upholds by continuing to question them in a spirit of enlightened self critical inquiry

Rationalist Pragmatism Mitchell Silver, 2020-07-07 In Rationalist Pragmatism A Framework for Moral Objectivism

Mitchell Silver draws from a wide array of philosophical fields to formulate a comprehensive theory of ethics. He argues that an understanding of justification rooted in pragmatism leads to practical principles that apply to all those we would recognize as persons. The account bears implications for the nature of selfhood, the freedom of the will, the meaning of moral terms, the power of moral principles to motivate, conceptions of truth, the nature of value, and the use and abuse of abstract moral theorizing. Rationalist Pragmatism develops its pragmatically informed morality in light of prominent ethical schools as well as relevant topics in the philosophy of language, metaphysics, and epistemology, including the correspondence theory of truth, inferentialist semantics, motivational internalism, the source of value, and experimental philosophy. Finally, Silver explores concrete moral and political implications of his theory, demonstrating that metaethics can affect positions regarding the morality of personal relations, the treatment of animals, and political assessments of democracy, socialism, and nationalism. Silver maintains that our interest in truth, our rational nature as practical and theoretical beings, forms us as a community of mutually recognizing truth seekers.

A Thing of This World Lee Braver, 2007-07-13 Combining conceptual rigour and

clarity of prose with historical erudition, this book shows how one of the standard issues of analytic philosophy, realism and anti-realism, has also been at the heart of continental philosophy.

Bioethics in Cultural Contexts Christoph

Rehmann-Sutter, Marcus Düwell, Dietmar Mieth, 2006-03-08 CHRISTOPH REHMANN SUTTER, MARCUS DÜWELL, DIETMAR MIETH

When we placed finitude as a motto over a round of discussion on biomedicine and bioethics, which led to this collection of essays, we did not know how far this would lead us into methodological quandaries. However, we felt intuitively that an interdisciplinary approach including social and cultural sciences would have an advantage over a solely disciplinary philosophical or theological analysis. Bioethics, if it is to have adequate discriminatory power, should include sensitivity to the cultural contexts of biomedicine and also to the cultural contexts of bioethics itself. Context awareness of course is not foreign to philosophical or theological bioethics for the simple reason that the issues tackled in the debates, as in other fields of ethics, could not be adequately understood outside their contexts. Moral issues are always accompanied by contexts. When we try to unpack them, which is necessary to make them accessible to ethical discussion, we are regularly confronted with the fact that in removing too much of the context we do not clarify an issue but make it less comprehensible. The context, at least some essential parts of it, is intrinsic to the issue. Unpacking in ethics is therefore a different procedure. It does not mean peeling the context off but rather identifying which contextual elements are essential for an understanding of the key moral aspects of the issue and explaining how they establish its particular character.

Reconstructing Theology Terence Bateman, 2014 Francis Schussler Fiorenza is one of the pivotal contemporary Roman

Catholics working in the field of systematic theology and has made vital contributions to the discipline. This book, the first of its kind, provides an overview of Fiorenza's theological biography from early influences and original insights to a

comprehensively systematic project to reconstruct the foundations of theology and explicates the major contours of Fiorenza's vital contributions to theological method foundational systematic and constructive theology and the practical function of religion in society and politics As the author argues Fiorenza's vision is one of unrivaled clarity and coherence even more it follows a path of the shifting patterns in theology over the past half century thus shedding light upon the internal constitution of recent Catholic and Protestant theology

Philosophy in Cultural Theory Peter Osborne, 2013-12-16 Philosophy in Cultural Theory boldly crosses disciplinary boundaries to offer a philosophical critique of cultural theory today Drawing on the legacy of Walter Benjamin Peter Osborne looks critically at central philosophical debates in cultural theory such as the relationship between sign and image the technological basis of cultural form the conceptuality of art the place of fantasy in human affairs It will appeal to those in philosophy cultural studies and art theory

Global Citizenship Education, 2008-01-01 The essays in this edited collection argue that global citizenship education realistically must be set against the imperfections of our contemporary political realities As a form of education it must actively engage in a critically informed way with a set of complex inherited historical issues that emerge out of a colonial past and the savage globalization which often perpetuates unequal power relations or cause new inequalities The essays in the book explore these issues and the emergent world ideologies of globalism as well as present territorial conflicts ethnic tribal and nationalist rivalries problems of increasing international migration and asylum growing regional imbalances and increasing world inequalities Contributors to this collection each on their own way argues that global citizenship education needs to project new values to reality test and debate the language concepts and theories of global citizenship and the proto world institutions that seek to give expression to nascent aspirations for international forms of social justice and citizen participation in world government Many of the contributors argue that global citizenship education offers the prospect of extending the liberal ideologies of human rights and multiculturalism and of developing a better understanding of forms of post colonialism One thing is sure as the essays presented in this book demonstrate so clearly there can be no one dominant notion of global citizenship education as notions of global citizenship and education are all contested and open to further argument and revision Global citizenship education does not name the moment of global citizenship or even its emergence so much as the hope of a form of order where the rights of the individual and of cultural groups irrespective of race gender ethnicity or creed are observed preserved and protected by all governments in order to become the basis of citizen participation in new global spaces that we might be

applying Mensch's idea of a post-foundational phenomenology this anthology honors Mensch's expansive work which spans key thinkers such as Husserl, Levinas, Merleau-Ponty and Patočka and delves into subjects ranging from perception and time to ethics and ecology. The volume is meant for students and researchers and explores these three interwoven conditions in various ways.

Why Solipsism Matters Sami Pihlström, 2020-05-14 Solipsism is one of the philosophical theses or ideas that has generally been regarded as highly implausible or even crazy. The view that the world is my world in the sense that nothing exists independently of my mind, thought and/or experience is understandably frowned upon as a genuine philosophical position. For this reason solipsism might be regarded as an example of a philosophical position that does not matter at all. It does not seem to play any role in our serious attempts to understand the world and ourselves. However, by arguing that solipsism does matter after all, *Why Solipsism Matters* more generally demonstrates that philosophy even when dealing with highly counterintuitive and crazy ideas may matter in surprising, unexpected ways. It will be shown that the challenge of solipsism should make us rethink fundamental assumptions concerning subjectivity, objectivity, realism vs. idealism, relativism as well as key topics such as ethical responsibility, that is, our ethical relations to other human beings and death and mortality. *Why Solipsism Matters* is not only an historical review of the origins and development of the concept of solipsism and an exploration of some of its key philosophers, Kant and Wittgenstein to name a few, but it develops an entirely new account of the idea. One which takes seriously the global, socially networked world in which we live in which the very real ramifications of solipsism, including narcissism, can be felt.

Existence and the Good Franklin I. Gamwell, 2012-01-02 Morals and politics depend on a metaphysical backing. All reality is marked by certain necessary features and a divine purpose inherent in all reality defines the good to which all human life should be directed. These are bold assertions in a climate where the credibility of metaphysics is widely denied. Indeed, for the past two centuries Western philosophy has been marked by a consensus that questions about moral and political life should be considered separately from questions about ultimate reality. In this challenging work Franklin I. Gamwell defends metaphysical necessity against both modern and postmodern critiques. The metaphysics vindicated is not the traditional form; both critiques typically have in view. However, instead Gamwell outlines a neoclassical project for which Alfred North Whitehead and Charles Hartshorne are the main philosophical resources. As it maintains the significance of theistic metaphysics, the book makes no appeal to religious authority but solely to common human experience and on this basis articulates principles of human purpose and democratic justice.

Religion among We the People Franklin I. Gamwell, 2015-10-07 Explores democracy with religious freedom and its dependence on theism. Franklin I. Gamwell holds that democracy with religious freedom is dependent on metaphysical theism. Democratic politics can be neutral to all religious convictions only if its constitution establishes a full and free discourse about the ultimate terms of justice and their application to decisions of the state and the divine good is the true ground of justice. Notably, Gamwell's view challenges virtually all current accounts of democracy with religious freedom. This uncommon

position emerges through a series of essays in which Gamwell engages a variety of conversation partners including Thomas Jefferson David Strauss Abraham Lincoln Jürgen Habermas Alfred North Whitehead Reinhold Niebuhr and Iris Murdoch Discussions of Jefferson Lincoln and the US Constitution illustrate the promise of neoclassical metaphysics as a context for interpreting US history Gamwell then defends his metaphysics against both modern refusals of metaphysics and accounts of ultimate reality offered by Niebuhr and Murdoch

Being and Power. A Phenomenological Ontology of Forms of Life

Daniel Rueda Garrido, 2024-01-23

Why do we act as we do Why do we assume that the way of being and behaving in our community is right good and common sense Why do we fail to understand those who act and feel differently These are some of the questions that this book raises and attempts to answer This ontology is rooted in the phenomenological tradition but with the innovation of taking the form of life as the central ontological unit We are our form of life but as a transcendental immanent reality this is not directly equivalent to culture or society it is rather the political realisation in the world of an image of the human being shared by a given community This overcomes the traditional dualities of individual and society consciousness and body facticity and freedom actuality and possibility The subject is a subject because it identifies with that image which is equivalent to the intersubjective consciousness of how one should act and be in the world This gives rise to multiple forms of life The latter implies a certain power to be who one wants to be In this way the book is an invitation to self examination for if our form of life is voluntary i.e. capitalism it shatters the illusion that one cannot live in any other way and places us before the anguished but inevitable task of justifying its adoption or resorting to its abandonment The book offers a dynamic analysis of human existence as the actualisation of a form of life that is at the same time the exercise of a certain power over those who seek to live otherwise especially when that form is institutionalised by a government as the essence of the national or transnational community
