Beaumont, 2017-09-05 Finalist for the 2018 Christian Book Award for Bible of the Year. New to the Bible? Either because you have become a Christian recently or because somehow the Bible seems to have passed you by. Then this edition is for you. Whether you are reading the Bible for the first time or not, its variety of material, not to mention its length, can seem overwhelming. It can be difficult for readers new to Scripture to explore its teachings and to see how Christian beliefs are established in its pages. But understanding both what we believe and why we believe it provides the foundation for a grounded Christian faith. The Christian Basics Bible is filled with features designed to help readers, especially those new to the Bible, connect biblical teachings to Christian beliefs and to see how those beliefs apply to their lives. By delivering the right amount of both information and application, The Christian Basics Bible can become the catalyst for living a vibrant Christian life.

**Baptist Foundations** Mark Dever, Jonathan Leeman, 2015-06-15 In this volume, representatives of several North American Baptist seminaries and a Baptist university make the exegetical and theological case for a Baptist polity. Right polity, they argue, is congregationalism, elder leadership, diaconal service, regenerate church membership, church discipline, and a Baptist approach to the ordinances.

Cohn, 2025-10-15 The second edition of *Fundamentals of AAC: A Case Based Approach to Enhancing Communication* continues to be a course friendly textbook designed to walk readers through the theoretical and clinical underpinnings of assessment, intervention and consultation for individuals with complex communication needs across the lifespan. Augmentative and alternative communication (AAC) encompasses a variety of communication methods and is used by those with a wide range of speech and language impairments. With a consistent framework and descriptive case studies as well as input from various stakeholders, readers can gain a comprehensive understanding of the needs of persons who use AAC and how to provide them with ethically and culturally considerate support. Unlike other texts on this topic, this book empowers readers to visualize AAC in action. Each chapter begins with fundamental concepts and principles followed by a relevant case study that presents the concepts and principles in action that guide the reader through the use of clinical decision making in AAC. Every case study is designed to underscore the cultural, linguistic and social variability inherent to the fields of AAC and communication sciences and how each individual influences the manifestation of the AAC system. Treatment and implementation plans are intended to easily translate into a 6, 8 or 13 week semester course. This textbook is divided into eight distinct sections. Section I provides an overview of AAC: no tech, mid tech and high tech AAC systems as well as mobile technology and advancing technology. Section II discusses language fundamentals. Section III reviews AAC assessment, intervention and implementation for toddlers, preschoolers and school aged individuals along with goal writing and data collection. Section IV covers assessment, intervention and implementation for young adults and adults needing AAC. Section V offers the reader detailed information and rich examples of the application of AAC for persons with developmental disabilities. Section VI provides the theoretical foundation and exemplar case studies of AAC for persons with acquired disabilities. Section VII details consultation and training for various stakeholders as well as tele AAC services. Section VIII presents a collection of essays from various stakeholders.
