## **Fundamentals Of Animal Behaviour:**

Essentials of Animal Behaviour Peter J. B. Slater, 1999-05-13 *Essentials of Animal Behaviour* is an introduction to the study of animal behaviour and is primarily intended for first or second year undergraduates attending short courses in the subject. The book concentrates on putting across the basic principles as briefly and lucidly as possible with the aid of carefully selected examples from both the recent and classic literature together with numerous illustrations. It will enthuse readers with this active and exciting area of research and will lay a solid foundation on which further study may be based. Its simple and readable style, helped by an extensive glossary, will also make it useful to senior level school students, their teachers, and those with a general interest in the subject. It will be particularly rewarding for all those needing the basics in animal behaviour, behavioural ecology, and comparative psychology.

**Foundations of Animal Behavior** Lynne D. Houck, Lee C. Drickamer, 1996-08 *Beginning with Darwin's work in the 1870s*, *Foundations of Animal Behavior* selects the most important works from the discipline's first hundred years: forty-four classic papers, and presents them in facsimile, tracing the development of the field. These papers are classics because they either founded a line of investigation, established a basic method, or provided a new approach to an important research question. The papers are divided into six sections, each introduced by prominent researchers. Sections one and two cover the origins and history of the field and the emergence of basic methods and approaches. They provide a background for sections three through six, which focus on development and learning, neural and hormonal mechanisms of behavior, sensory processes, orientation, and communication, and the evolution of behavior. This outstanding collection will serve as the basis for undergraduate and graduate seminars and as a reference for researchers in animal behavior, whether they focus on ethology, behavioral ecology, comparative psychology, or anthropology. Published in association with the Animal Behavior Society.
