EBOOK: Fundamentals of Digital Logic Stephen Brown, Zvonko Vranesic, 2008-07-16 Fundamentals of Digital Logic with VHDL Design teaches the basic design techniques for logic circuits. The text provides a clear and easily understandable discussion of logic circuit design without the use of unnecessary formalism. It emphasizes the synthesis of circuits and explains how circuits are implemented in real chips. Fundamental concepts are illustrated by using small examples which are easy to understand. Then a modular approach is used to show how larger circuits are designed. VHDL is a complex language so it is introduced gradually in the book. Each VHDL feature is presented as it becomes pertinent for the circuits being discussed. While it includes a discussion of VHDL, the book provides thorough coverage of the fundamental concepts of logic circuit design independent of the use of VHDL and CAD tools. A CD-ROM containing all of the VHDL design examples used in the book as well as Altera's Quartus II CAD software is included free with every text. Database and Expert Systems

Applications Abdelkader Hameurlain, Rosine Cicchetti, Roland Traunmüller, 2003-08-02 The 13th International Conference on Database and Expert Systems Applications was held on September 2-6, 2002, at the Université Aix-Marseille II, France. The quickly growing field of information systems required the establishment of more specialized discussion platforms: the DaWaK conference, EC Web conference, eGOV conference, and DEXA workshops, and there were held in parallel with DEXA also in Aix-en-Provence. The resulting book was prepared with great effort. Starting with the preparation of submitted papers, the papers went through the reviewing process. The accepted papers were revised to final versions by their authors and arranged to the conference program. This year, 241 papers were submitted, and our thanks go to all who have contributed. The program committee and the supporting reviewers produced altogether about 730 referee reports, on average three reports per paper, and selected 89 papers for presentation. The papers presented here encompass the extensive domain of databases together with the other conferences and workshops of the DEXA event cluster: a vast part of applied computer science was covered. In this way, DEXA has blazed the trail. At this point, we would like to acknowledge to all institutions which actively supported this conference and made it possible. These are IUT Université Aix-Marseille II, FAW DEXA Association, the Austrian Computer Society, and Microsoft Research.
