Fundamentals of Human Lymphoid Cell Culture J. Leslie Glick, Fundamentals of Human Lymphoid Cell Culture J. Leslie Glick, 1980 Flow Cytogenetics, 2012-12-02 This is the first book to be devoted entirely to the application and development of flow techniques in cytogenetics It provides comprehensive information on the use of flow cytometry and sorting for chromosome classification and purification Cytogenetics and molecular biologists will find this book an invaluable reference source Practical details for the preparation and analysis of chromosomes using flow cytometry Flow karyotyping for sensitive rapid analysis of chromosome normality and the detection of aberrant chromosomes Flow sorting as a source of chromosome specific DNA for gene mapping and recombinant DNA libraries Construction and current status of chromosome specific recombinant DNA libraries **Monoclonal Antibodies** Johann H. Peters, Horst Baumgarten, 2012-12-06 The present new version of this popular laboratory manual is at the same time the first one of this text in the English language and this makes me even a little proud as it reminds me of probably the first collection of monoclonal recipes in English written by myself which circulated for a couple of years in many laboratories In the meantime many researchers have put enormous effort into improving methods for monoclonal antibody production The procedures have become more and more standardized and by this have more and more lost the character of magic secrets Hinrich Peters and Horst Baumgarten who had followed this good tradition already in the previous edition written in German succeeded in making laboratory tricks teachable They had contributed their own experiences in cell culture and immunology and were able to engage a number of experienced authors to contribute to the work They were all willing to follow the general concept of this book which contains a brief theoretical background for the methods described and presents the procedures in a highly organized structure So the book has retained its shape as a cook book which I especially like **Current Catalog** National Library of Medicine (U.S.), 1983 First multi year cumulation covers six years 1965 70 **Proceedings of the first HLA Workshop of the Americas** Rene J.
