Intonational Grammar in Ibero-Romance Meghan E. Armstrong,Nicholas Henriksen,Maria del Mar Vanrell,2016-03-31 Intonational Grammar in Ibero Romance Approaches across linguistic subfields is a volume of empirical research papers incorporating recent theoretical methodological and interdisciplinary advances in the field of intonation as they relate to the Ibero Romance languages The volume brings together leading experts in Catalan Portuguese and Spanish as well as in the intonation of Spanish in contact situations The common thread is that each paper examines a specific topic related to the intonation of at least one Ibero Romance language framing the analysis in an experimental setting The novel findings of each chapter hinge on critical connections that are made between the study of intonation and its related fields of linguistic inquiry including syntax pragmatics sociophonetics language acquisition and special populations In this sense the volume expands the traditional scope of Ibero Romance intonation including in it work on signed languages LSC individuals with autism spectrum disorder and individuals with Williams Syndrome This volume establishes the precedent for researchers and advanced students who wish to explore the complexities of Ibero Romance intonation It also serves as a showcase of the most up to date methodologies in intonational research **Essays on Language in Societal Transformation** Tunde Opeibi,Josef Schmied,Tope Omoniyi,Kofo Adedeji,2015-01-30 This paper generally lends support to the arguments advanced by Awonusi 1989 1990 2004 and others in favour of an endornormative as opposed to an exonormative standard for English

pronunciation in Nigeria They include the fact that the existing exonormative standard British Received Pronunciation RP has undergone and is still undergoing changes in its homeland and is not homogeneous The heightened social mobility of today s world perhaps works against the demarcation and homogenization of language varieties and this is all the more true of the varieties or lects that have been proposed for Nigerian English when these are related more or less explicitly to educational attainment Major attention is given in the paper to a schema of basilect mesolect and acrolect presented by Ugorji 2010 with a focus on his account of vowels and his presentation of a mechanism derived from optimality theory for evaluating vowels in contention The basilect and the mesolect are found to be so close to each other that they might be combined There would then be just two varieties In contrast the acrolect is close to British RP albeit with many variants due to the conflict of two standardising forces i e British RP and the basilect mesolect The vowel system of an officially adopted endonormative standard Nigerian RP would mainly be the same as that of British RP but the optimality mechanism could be employed to give preference to some of the Nigerian variants for inclusion in it     <u>Linguistic Areas</u> April McMahon,2006-05-02 The contributors to this collection address issues of definition and theory of linguistic areas analyze the process of convergence and introduce methods to assess the impact of language contact across geographical zones New case studies are accompanied by discussions that revisit some of the more well established linguistic areas     <u>Prosodic Typology</u> Sun-Ah Jun,2006 This book illustrates an approach to prosodic typology through descriptions of the intonation and the prosodic structure of thirteen typologically different languages based on the same theoretical framework the autosegmental metrical model of intonational phonology and the transcription system of prosody known as Tones and Break Indices ToBI It is the first book introducing the history and principles of this system and it covers European languages Asian languages an Australian aboriginal language and an American Indian language The book shows how languages and dialects are similar to or different from other languages or dialect varieties in terms of the prosodic structure the intonational categories and their realizations This is the first book on intonation which is accompanied by a CD ROM where sound files mentioned in each chapter are stored     **New Explorations in Chinese Theoretical Syntax** Andrew Simpson,2022-04-15 This volume brings together 19 cutting edge studies written by some of the most prominent linguists working on Chinese formal syntax as a Festschrift volume dedicated to Yen Hui Audrey Li The contributions to the volume address a wide range of issues currently developing in the field of Chinese syntax grouped into five thematic sections on the structure of lexical and functional projections modal verb syntax syntax semantics interactions the syntax and interpretation of particles and the acquisition of syntactic structures With its rich descriptive content sourced from different varieties of Chinese and its theoretical orientation and analyses the book provides an important new resource both for researchers with a primary interest in Chinese and other linguists interested in discovering how properties of Chinese can inform the analysis of other languages     **English as an International Language** Farzad Sharifian,2009-01-08 Collectively the chapters in this volume make a
