**Freud and Philosophy** Paul Ricoeur,1970-01-01 If Paul

Ricoeur is correct in seeing the various currents of contemporary philosophy all converging on the problem of a grand philosophy of language then the first sixty pages of this absorbing study of Freud may become the rallying point from which future work can begin This first part of Freud and Philosophy Problematic presents a profound and clear theory of signification symbol and interpretation The second part A Reading of Freud is required reading for anyone seriously interested in psychoanalysis The third section interpretation of Ricoeur s own theory of symbol particularly religious symbol which places this study at the center of contemporary debate over the sense of myth In this book are revealed Ricoeur the philosopher of language Ricoeur the critic of Freud and Ricoeur the theologian of religious symbol The author is outstanding in all three roles and the book that emerges is of rare profundity enormous scope and complete timeliness Paul Ricoeur is professor of philosophy at the University of Paris Paul Ricoeur has done a study that is all too rare these days in which one intellect comes to grips with another in which a scholar devotes himself to a thoughtful searching and comprehensive study of a genius The final result is a unique survey of the panorama of Freudian thought by an observer who although starting from outside succeeds in penetrating to its core American Journal of Psychiatry Primarily an inquiry into the foundations of language and hermeneutics Ricoeur uses the Freudian hermeneutics of suspicion as a corrective and counter balance for phenomenology and create a new phenomenology This important work should have an impact upon serious thinking in philosophy theology psychology and other areas which have been affected by Freud studies International Philosophical Quarterly A stimulating tour de force that allows us to envisage both the psychoanalytic body of knowledge and the psychoanalytic movement in a broad perspective within the framework of its links to culture history and the evolution of Western intellectual thought Psychoanalytic Quarterly Paul Ricoeur is a professor of philosophy at the University of Chicago and the University of Paris

is a scientist's answer to attacks on faith by some well-meaning scientists and philosophers. It is a firm rebuke of the Four Horsemen: Richard Dawkins, Daniel Dennett, Sam Harris, and Christopher Hitchens, known for writing about religion as something irrational and ultimately harmful. Anthropologist Melvin Konner, who was raised as an Orthodox Jew but has lived his adult life without such faith, explores the psychology, development, brain science, evolution, and even genetics of the varied religious impulses we experience as a species. Conceding that faith is not for everyone, he views religious people with a sympathetic eye. His own upbringing, his apprenticeship in the trance dance religion of the African Bushmen, and his friends' and explorations in Christian, Buddhist, Hindu, Muslim, and other faiths have all shaped his perspective. Faith has always manifested itself in different ways: some revelatory and comforting, some kind and good, some ecumenical and cosmopolitan, some bigoted, coercive, and violent. But the future, Konner argues, will both produce more nonbelievers and incline the religious among us to hold their own by having larger families to increasingly reject prejudice and aggression. A colorful weave of personal stories of religious and irreligious encounters, as well as new scientific research, *Believers* shows us that religion does much good as well as undoubted harm, and that for at least a large minority of humanity, the belief in things unseen neither can nor should go away.
