Integration of European Banking Pedro Pita Barros, 2005 Annotation The regulation of network industries has emerged as a key issue on the European policy agenda yet there is little high quality research capable of informing the European policy debate The Monitoring European Deregulation MED series was launched by CEPR and SNS in 1997 and features new policy oriented research on the liberalization of the European markets of the major network industries previous reports have focused on telecommunications and electricity Addressed to a wide audience of both academics and European decisionmakers in the private sector and policy communities at both the national and EU level the new report which focuses on the deregulation of the European banking system will play an important role in influencing current thinking on these issues and contributing to the policy debate *Alternative Perspectives on Economic Policies in the European Union* P.

Vallascas, 2013-10-03 The financial crisis that erupted in 2007 has brought the issues of the size risk and regulation of banks to the attention of a wide audience It is difficult to open a broadsheet newspaper or a business magazine without being confronted with some aspect of bank behaviour be it their risk levels bankers excessive rewards the intertwining of bank and sovereign risk or how they should be regulated to avoid problems in the future In Europe the recent and on going crisis has demonstrated that the European Union EU was institutionally ill prepared to manage a financial crisis especially one involving large cross border institutions which are systemically important to a number of countries This book aims at integrating and synthesizing the various perspectives on the size risk and governance of banking as applied to the European markets providing fresh insights and new analysis of the empirical data The book is divided into three main sections The first provides an overview of how the size of banking firms affects stability in the European banking sector reviewing the quantitative empirical literature and offering new insights as to whether bank size motivates risk taking where explicit or implicit too big to fail policies shield bank creditors from market discipline The next section discusses the debates relating to each of the different elements of risk in European banking including new insights from a large dataset of European bank risk in different institutional contexts The third section focuses on regulation board monitoring and opacity in European banking employing a unique and hand collected dataset on the governance of European banks as well as data on U S banks as a benchmark The final chapter critically reviews the new insights gained from the chapters above while offering policy implications as regards the role of size risk and governance in European banking **Crises and Integration in European**
