Architecture and

Mathematics from Antiquity to the Future Kim Williams, Michael J. Ostwald, 2015-02-11 Every age and every culture has relied on the incorporation of mathematics in their works of architecture to imbue the built environment with meaning and order. Mathematics is also central to the production of architecture to its methods of measurement, fabrication and analysis. This two-volume edited collection presents a detailed portrait of the ways in which two seemingly different disciplines are interconnected. Over almost 100 chapters it illustrates and examines the relationship between architecture and mathematics. Contributors of these chapters come from a wide range of disciplines and backgrounds: architects, mathematicians, historians, theoreticians, scientists and educators. Through this work, architecture may be seen and understood in a new light by professionals as well as non-professionals. Volume II covers architecture from the Late Renaissance era through Baroque, Ottoman, Enlightenment, Modern and contemporary styles and approaches. Key figures covered in this volume include Palladio, Michelangelo, Borromini, Sinan, Wren, Wright, Le Corbusier, Breuer, Niemeyer and Kahn. Mathematical themes which are considered include linear algebra, tiling and fractals, and the geographic span of the volume's content includes works in the United States of America and Australia in addition to those in Europe and Asia.

Architectural Theory of Modernism Ute Poerschke, 2016-04-20 Architectural Theory of Modernism presents an overview of the discourse on function, form, concepts from the beginnings in the eighteenth century to its peak in High Modernism. Functionalist thinking and its postmodern criticism during the second half of the twentieth century is explored, as well as today's functionalism in the context of systems theory, sustainability, digital design and the information society. The book covers, among others, the theories of Carlo Lodoli, Gottfried Semper, Eugène Emmanuel Viollet-le-Duc, Louis Sullivan, Frank Lloyd Wright, Hannes Meyer, Adolf Behne, CIAM, Jane Jacobs, Robert Venturi and Denise Scott Brown, Charles Jencks, William Mitchell and Manuel Castells.

Frank Lloyd Wright and the Path to Beauty Kenneth Dahlin, 2025-06-19 This book connects Frank Lloyd Wright's organic theory with his pursuit of beauty, presenting a path for the recovery of beauty in architecture. While there has been a resurgence of interest in beauty in architecture, recently the modern uglification of our built environment means there is no clear pathway to define or find it. In this study, Wright's organic theory provides such a path to reclaim this beauty. Tracing the evolution of Wright's concept of organic architecture, author Kenneth Dahlin explores Wright's middle way, a route mediating between traditional historical precedents and today's novelty-driven architectural culture, often detached from deeper notions of harmony and beauty. Chapters explore Wright's romanticist roots in the late 19th and early 20th centuries, including the House Beautiful movement, the centrality of Japanese aesthetics and his concept of the integrated whole. Two chapters on Aristotle and Hegel ground Wright's pursuit of beauty in philosophical aesthetics, setting the stage for a concluding synthesis that unites the various strands of Wright's theory into a model theory of organic architecture for the future. This book will be of interest to Frank Lloyd Wright scholars and enthusiasts as well as postgraduate and advanced undergraduate architecture students.

The Architectural Detail Edward R. Ford, 2012-08-10 The Architectural Detail is

author Edward R Ford's life's work and this may be his most important book to date Ford walks the reader through five widely accepted and wildly different definitions of detail in an attempt to find once and for all the quintessential definition of detail in architecture Revealing Architectural Design Philip D. Plowright, 2014-01-10 Revealing Architectural Design examines the architectural design process from the point of view of knowledge domains domain syntax coherence framing thinking styles decision making and testing Using straightforward language the book connects general design thinking to underlying frameworks that are used in the architectural design process The book provides historical grounding as well as clear examples of real design outcomes It includes diagrams and explanations to make that content accessible The frameworks and their methods are described by what they can accomplish what biases they introduce and the use of their final outcomes Revealing Architectural Design is an advanced primer useful to anyone interested in increasing the quality of their architectural design proposals through understanding the conceptual tools used to achieve that process While it is intended for undergraduate and graduate students of architectural design it will also be useful for experienced architectural practitioners For the non architect this book opens a window into the priorities of a discipline seldom presented with such transparency Shadow-Makers Stephen Kite, 2017-10-19 The making of shadows is an act as old as architecture itself From the gloom of the medieval hearth through to the masterworks of modernism shadows have been an essential yet neglected presence in architectural history Shadow Makers tells for the first time the history of shadows in architecture It weaves together a rich narrative combining close readings of significant buildings both ancient and modern with architectural theory and art history to reveal the key places and moments where shadows shaped architecture in distinctive and dynamic ways It shows how shadows are used as an architectural instrument of form composition and visual effect while also exploring the deeper cultural context tracing differing conceptions of their meaning and symbolism whether as places of refuge devotion terror occult practice sublime experience or as metaphors of the unconscious Within a chronological framework encompassing medieval baroque enlightenment sublime picturesque and modernist movements a wide range of topics are explored from Hawksmoor's London churches Japanese temple complexes and the shade patterns of Islamic cities to Ruskin in Venice and Aldo Rossi and Louis Kahn in the 20th century This beautifully illustrated study seeks to understand the work of these shadow makers through their drawings their writings and through the masterpieces they built
