Financing Regional Growth and the Inter-American Development Bank Ernesto Vivares, 2013-05-02 The crisis of the current global financial order is challenging us to critically reflect on how this order has been driven and the development outcomes produced by its central political and economic actors There is a great deal of academic knowledge about the role of the international financial institutions powerful states and capital markets in international development but there is little understanding of how regional dynamics and regional institutions influence global governance and developing countries This book offers an independent and grounded investigation concerning the political economic role of Regional Development Banks through a study of the world's leading regional development bank the Inter American Development Bank IDB The book examines the political economy of the IDB and its role in regional and national development during the neoliberalisation processes of the 1990s In particular the investigations explore the IDB's power in regional and national development via its technical political and financial interventions to frame policy alternatives absorb opposition forces support specific coalition forces and justify a particular direction of development all in order to legitimize specific political

economic projects directed by market led pro reform coalitions aligned with global financial forces and financial development guidelines This book will be relevant to scholars and professionals interested in the international and regional political economy of development financing **The European Union and International Development** Maurizio

Carbone,2007-12-12 The European Union is a leading actor in international development providing more than half of the world s foreign aid but also a unique case combining the characteristics of a bilateral and a multilateral donor Despite the general acknowledgment that policy coordination substantially improves both the effectiveness of foreign aid and the visibility of the EU in the international arena Member States have consistently resisted any intrusion into what they consider a key area of their national sovereignty The increases in volume of aid the ambitious agenda on aid effectiveness and the adoption of the European Consensus on Development indicate a change of direction Using development policy as a starting point this book provides a systematic analysis of the interaction between the European Commission and Member States It explores the conditions in which the European Commission influences outcomes in the EU decision making process It ultimately argues that the European Commission plays a leadership role but this leadership is contingent upon the presence of an institutional entrepreneur its internal cohesiveness and the astute use of a repertoire of tactics Demonstrating that development policy may provide fresh insights into EU integration theory this book will be of interest to students and scholars of European Politics and International Development *International Finance and Development* Jose Antonio

Regional Financial Cooperation Jose Antonio Ocampo, 2007-08-29 A Brookings Institution Press and Economic Commission for Latin America and the Caribbean ECLAC publication Using the experience of postwar Western Europe as a benchmark Jos Antonio Ocampo and his colleagues assess how regional financial institutions can help developing countries often at a disadvantage within the global financial framework finance their investment needs counteract the volatility of private capital flows and make their voices heard The 1997 Asian financial crisis generated extensive debate on the international financial architecture Through this discussion it became clear that services by financial institutions including adequate mechanisms for preventing and managing financial crises and instruments for safeguarding global macroeconomic and financial stability are undersupplied Furthermore private international capital markets provide finance to developing countries in a way that effectively reduces the ability of those nations to undertake countercyclical macroeconomic policies International capital markets ration out many developing countries particularly the poorest from private global capital markets While these deficiencies in the financial architecture are clear the post 1997 debate has done little to evaluate the role that regional institutions could play in improving global financial arrangements Regional Financial Cooperation aims to fill that important gap Contributors include Ernest Aryeetey Institute of Statistical Social and Economic Research University of Ghana Georges Corm Saint Joseph University Beirut Roy Culpeper North South Institute Ottawa Ana Teresa Fuzzo de Lima Institute of Development Studies University of Sussex Stephany Griffith Jones Institute of Development Studies University of Sussex Julia Leung Hong Kong Monetary Authority Jos Luis Machinea ECLAC Jae Ha Park Korean Institute of Finance Yung Chul Park Korea University Fernando Prada FORO Naciona International Lima Guillermo Rozenwurcel School of Politics and Government University of San Martin Argentina

Aid, Growth and Poverty Jonathan Glennie, Andy Sumner, 2016-05-30 The authors discuss the impact of foreign aid and tackle the question of why assessing the impact of aid is so difficult The authors focus on peer reviewed cross country studies published over the last decade and draw together some global level assessments considering the context and conditions under which aid might be said to work Glennie and Sumner argue that the evidence in four areas shows signs of convergence that may have direct relevance for policy decisions on aid and for aid effectiveness discussions These are as follows Aid levels meaning if aid is too low or too high Domestic political institutions including political stability and extent of decentralisation Aid composition including sectors modalities objectives and time horizons and Aid volatility and fragmentation Notably this study finds that there is no consensus that the effectiveness of aid depends on orthodox economic policies
