Sánchez Gassen, 2014-08-20 Nora E S nchez Gassen analyses how demographic trends and electoral law have influenced the German electorate in the past and projects their future impact A set of population projections illustrates how the size and age structure of the electorate will change until 2030 due to ongoing demographic changes Additional analyses reveal how reforms of electoral law and citizenship law could be used to influence these trends Overall the author combines demographic methods with democratic theory in order to investigate a topic that has so far received little attention in discussions on demographic change the future of the democratic system      **Germany and the Future of European Security** C. Silva, Ricardo Mamede, 2014-06-20 The onset of the global crisis has emphasised the persistence of substantial differences in development and social progress within the euro area. The specific case of countries located in the southern periphery region has come to the centre stage due to the harsh economic conditions that all these countries have experienced in the recent past. In the aftermath of the American subprime credit bubble, these countries' high indebtedness raised doubts as to their ability to sustain public finances with the financial crisis developing and gaining momentum due to the fragilities presented in the economy. To varying degrees of severity, all of these economies have since been forced to introduce strong fiscal tightening programmes in order to achieve fiscal consolidation, which have translated into recession and rising unemployment. This book undertakes a comprehensive analysis of the causes of the crisis in southern European countries, showing that the Achilles heel of these economies is rooted in the dismal evolution of productivity and in a specialisation pattern excessively based on the so-called traditional low and low-medium tech industries, which yield low margins, declining export shares and ultimately withering international competitiveness. Such evidence suggests that the southern European periphery industrial growth model has reached its limits, demanding a multidimensional policy approach capable of overcoming the magnitude and complexity of the present crisis. Without denying the need to adjust public and private balance sheets, it is argued that finding a sustainable path out of the present problems requires addressing the challenges of productivity growth and competitiveness in the long term.

**OECD Development Co-operation Peer Reviews: Germany 2015** OECD, 2015-11-04 The OECD Development Assistance Committee (DAC) conducts periodic reviews of the individual development co-operation efforts of DAC members. The policies and programmes of each member are critically examined approximately once every five years.
