

The Future of Hegel: Plasticity, Temporality, Dialectic¹

CATHERINE MALABOU

Translated by Elisabeth Doring

At the center of Catherine Malabou's study of Hegel is a defense of Hegel's relation to time and the future. While many readers, following Kojève, have taken Hegel to be announcing the end of history, Malabou finds a more supple impulse, open to the new, the unexpected. She takes as her guiding thread the concept of "plasticity," and shows how Hegel's dialectic—introducing the sculptor's art into philosophy—is motivated by the desire for transformation. Malabou is a savvy and faithful reader, and allows her classic "maître" to speak, if not against his own grain, at least against a tradition too attached to closure and system. Malabou's Hegel is a "plastic" thinker, not a metaphysical metaphysician.

INTRODUCTION: THE PROBLEMATIC

A. IS HEGEL'S PHILOSOPHY A "THING OF THE PAST"?

The future of Hegel is a title that presents itself in the affirmative, as if it knows there is a positive answer to the question it anticipates. "Does Hegel have a future?" Inevitably, at the end of this century, the question must still be posed. For in this time, philosophy, while acknowledging the stature of G. W. F. Hegel and its debt to his thought, has suspected speculative idealism of submitting to a totalizing or even a totalitarian structure. If speculative philosophy has not been entirely rejected, it has been at the very least kept at a distance. It is impossible, therefore, to consider Hegel's future today as something already guaranteed, as an established and recognized fact. This future itself needs to happen. It remains to be demonstrated, and to be examined. Such an examination is what the present work intends to provide.

Plasticity at the Dusk of Writing Catherine Malabou, 2009-11-16 A former student and collaborator of Jacques Derrida Catherine Malabou has generated worldwide acclaim for her progressive rethinking of postmodern Derridean critique Building on her notion of plasticity a term she originally borrowed from Hegel's Phenomenology of Spirit and adapted to a reading of Hegel's own work Malabou transforms our understanding of the political and the religious revealing the malleable nature of these concepts and their openness to positive reinvention In French to describe something as plastic is to recognize both its flexibility and its explosiveness its capacity not only to receive and give form but to annihilate it as well After defining plasticity in terms of its active embodiments Malabou applies the notion to the work of Hegel Heidegger Levinas Levi Strauss Freud and Derrida recasting their writing as a process of change rather than mediation between dialectic and deconstruction Malabou contrasts plasticity against the graphic element of Derrida's work and the notion of trace in Derrida and Levinas arguing that plasticity refers to sculptural forms that accommodate or express a trace She then expands this analysis to the realms of politics and religion claiming against Derrida that the event of justice and democracy is not fixed but susceptible to human action

Dialectics, Politics, and the Contemporary Value of Hegel's Practical Philosophy Andrew Buchwalter, 2012-11-12 This book explores and details the actuality Aktualit t of Hegel's social and political philosophy its relevance topicality and contemporary validity It asserts against the assumptions of those in a wide range of traditions that Hegel's thought not only remains relevant to debates in current social and political theory but is capable of productively enhancing and enriching those debates The book is divided into three main sections Part 1 considers the actuality of Hegel's social and political thought in the context of a constructed dialogues with later social and political theorists including Marx Adorno Habermas and Rawls Part 2 explores Hegel's internal criticism of Enlightenment rationality as well as the unique manner in which his thought reaffirms both the classical tradition of politics and the Christian conception of freedom in order to deepen and further develop our understanding of modernity and modern secularity Part 3 considers Hegel's contribution to current theorizing about globalization

Hegel's Rabble Frank Ruda, 2011-10-06 In Hegel's Rabble Frank Ruda identifies and explores a crucial problem in the Hegelian philosophy of right that strikes at the heart of Hegel's conception of the state This singular problem which Ruda argues is the problem of Hegelian political thought appears in Hegel's text only in a seemingly marginal form under the name of the rabble a particular side effect of the dialectical deduction of the

necessity of the existence of state from the contradictory constitution of civil society Working out from a thorough analysis of this problem and drawing on contemporary discussions in the work of such thinkers as Alain Badiou Jean Luc Nancy and Slavoj Zizek the book proceeds to re examine and reconstruct Hegel s entire political project Ruda goes on to argue that only by re thinking this problem of the rabble in Hegel s thought the only problem Hegel is able neither to resolve nor to sublimate can the early Marxian conception of the proletariat be properly understood The book closes with an Afterword from Slavoj Zizek

Thinking Catherine Malabou Thomas Wormald,Isabell Dahms,2018-03-28 This volume contributes to the growing body of literature exploring the work of contemporary French philosopher Catherine Malabou Through its fifteen contributions including two previously untranslated essays by Malabou the volume explores the various ways in which Malabou s thought both performs and furnishes resources for the negotiation of philosophy s attachment and detachment from itself and other disciplines What kind of interaction can philosophy have with either science or politics without conquering them How does one carry out philosophy while subverting it changing it directing it on or opening it up to different pathways The chapters explore the detachment of Malabou from her own philosophical training in deconstruction the theme of habit and the question of new attachments detachments through the relation of Malabou s thought and science and the detachments that transpire through philosophy s confrontation with politics In order to have a future philosophy must detach from its own tradition and passionately confront questions of race gender and colonialism

Committing the Future to Memory Sarah Clift,2013-09-01 Whereas historical determinacy conceives the past as a complex and unstable network of causalities this book asks how history can be related to a more radical future To pose that question it does not reject determinacy outright but rather seeks to explore how it works In examining what it means to be determined by history it also asks what kind of openings there might be in our encounters with history for interruptions re readings and re writings Engaging texts spanning multiple genres and several centuries from John Locke to Maurice Blanchot from Hegel to Benjamin Clift looks at experiences of time that exceed the historical narration of experiences said to have occurred in time She focuses on the co existence of multiple temporalities and opens up the quintessentially modern notion of historical succession to other possibilities The alternatives she draws out include the mediations of language and narration temporal leaps oscillations and blockages and the role played by contingency in representation She argues that such alternatives compel us to reassess the ways we understand history and identity in a traumatic or indeed in a post traumatic age

The Anthropology of the Future Rebecca Bryant,Daniel M. Knight,2019-03-28 Anticipation Expectation Speculation Potentiality Hope Destiny *Literature and Event* Mantra Mukim,Derek Attridge,2021-11-29 If event is a proper name we reserve for monumental changes crises transitions and ruptures that are by their very nature unnameable or unthinkable then this volume is an attempt to set up an encounter between such eventhood as it comes to have a bearing on literary works and the work of reading literature As the event continues to provide a valuable analytical paradigm for work undertaken within the newer subdisciplines of literary and critical theory including close reading bio politics world literature and eco criticism this volume makes a concerted effort to update the scholarship in this area and foreground the recent resurgence of interest in the concept The book provides both a retrospective appraisal of the significance of events to literary studies and the literary humanities as well as contemporary and prospective appraisals of the same and thus would appeal scholars and instructors in the areas of literary theory comparative literature and philosophical aesthetics alike Along with a specialist focus on thinkers such as Derrida Badiou Deleuze and Malabou the essays in this volume read a wide corpus of literature ranging from Han Kang Homer Renee Gladman Proust and Flaubert to Yoruba ideophones Browning Anne Carson Jenichiro Oyabe and Ben Lerner *Justice,*

Knowing Future Time In and Through Greek Historiography Alexandra Lianeri, 2016-03-07 From the early modern period Greek historiography has been studied in the context of Cicero's notion *historia magistra vitae* and considered to exclude conceptions of the future as different from the present and past Comparisons with the Roman Judeo Christian and modern historiography have sought to justify this perspective by drawing on a category of the future as a temporal mode that breaks with the present In this volume distinguished classicists and historians challenge this contention by raising the question of what the future was and meant in antiquity by offering fresh considerations of prognostic and anticipatory voices in Greek historiography from Herodotus to Appian and by tracing the roots of established views on historical time in the opposition between antiquity and modernity They look both at contemporary scholarly argument and the writings of Greek historians in order to explore the relation of time especially the future to an idea of the historical that is formulated in the plural and is always in motion By reflecting on the prognostic of historical time the volume will be of interest not only to classical scholars but to all who are interested in the history and theory of historical time

Derrida after the End of Writing Clayton Crockett, 2017-11-07 What are we to make of Jacques Derrida's famous claim that every other is every other if the other could also be an object a stone or an elementary particle Derrida's philosophy is relevant not just for human ethical language and animality but to profound developments in the physical and natural sciences as well as ecology Derrida *After the End of Writing* argues for the importance of reading Derrida's later work from a new materialist perspective In conversation with Heidegger Lacan and Deleuze and critically engaging newer philosophies of speculative realism and object oriented ontology Crockett claims that Derrida was never a linguistic idealist Furthermore something changes in his later philosophy something that cannot be simply described as a

turn In Catherine Malabou's terms there is a shift from a motor scheme of writing to a motor scheme of plasticity Crockett explores some of the implications of interpreting Derrida through the new materialist lens of technicity or plasticity attending to the significance of ethics religion and politics in his later work By reading Derrida from a new materialist perspective Crockett provides fresh readings of his ideas of sovereignty religion responsibility and mourning These new readings produce fruitful engagements with the thinkers who have followed Derrida including Malabou Timothy Morton John D Caputo and Karen Barad Here is a new reading of Derrida that moves beyond conventional understandings of poststructuralism and deconstruction a reading that is responsive to and critical of some of the crucial developments shaping the humanities today

Understanding Hegelianism Robert Sinnerbrink, 2014-12-05 Understanding Hegelianism explores the ways in which Hegelian and anti Hegelian currents of thought have shaped some of the most significant movements in twentieth century European philosophy particularly the traditions of critical theory existentialism Marxism and poststructuralism The first part of the book examines Kierkegaard's existentialism and Marx's materialism which present two defining poles of subsequent Hegelian and anti Hegelian movements The second part looks at the contrasting critiques of Hegel by Lukacs and Heidegger which set the stage for the appropriation of Hegelian themes in German critical theory and the anti Hegelian turn in French poststructuralism The role of Hegelian themes in the work of Adorno Habermas and Honneth are explored In the third part the rich tradition of Hegelianism in modern French philosophy is considered the work of Wahl Kojève Hyppolite Lefebvre Sartre de Beauvoir as well as the radical critique of Hegelianism articulated by Derrida and Deleuze Although the focus is primarily on German and French appropriations of Hegelian thought the author also explores some of the recent developments in Anglophone Hegelianism

States of Shock Bernard Stiegler, 2015-02-17 In 1944 Horkheimer and Adorno warned that industrial society turns reason into rationalization and Polanyi warned of the dangers of the self regulating market but today argues Stiegler this regression of reason has led to societies dominated by unreason stupidity and madness However philosophy in the second half of the twentieth century abandoned the critique of political economy and poststructuralism left its heirs helpless and disarmed in face of the reign of stupidity and an economic crisis of global proportions New theories and concepts are required today to think through these issues The thinkers of poststructuralism Lyotard Deleuze Derrida must be re read as must the sources of their thought Hegel and Marx But we must also take account of Naomi Klein's critique of Milton Friedman and the Chicago School and her account of the shock doctrine In fact argues Stiegler a permanent state of shock has prevailed since the beginning of the industrial revolution intensified by the creative destruction brought about by the consumerist model The result has been a capitalism that destroys desire and reason and in which every institution is undermined above all those institutions that are the products par excellence of the Enlightenment the education system and universities Through a powerful critique of thinkers from Marx to Derrida Stiegler develops new conceptual weapons to fight this destruction He argues that schools and universities must themselves be transformed new

educational institutions must be developed both to take account of the dangers of digitization and the internet and to enable us to take advantage of the new opportunities they make available

Zizek and Theology Adam Kotsko, 2008-05-26 Slavoj Žižek has been called an academic rock star. As public visibility of the Slovenian philosopher and psychoanalyst increases, so too does the depth of his engagement with Christian theology. Žižek's recent work includes extended treatments of key Christian thinkers from Paul Pascal and Kierkegaard to G. K. Chesterton and C. S. Lewis, while Christology and other theological themes have provided crucial points of reference. Žižek has even said that to become a true dialectical materialist, one should go through the Christian experience. But Žižek's work on Christianity often overwhelms students of theology. To be sure, Žižek's style of argumentation is unusual, and his concepts are complex. But the more basic problem is that his work on Christianity is a further development of a broader intellectual project established in many volumes produced in the course of the 1990s. This book will bring students of theology up to speed on this broader intellectual project with an eye toward what brings Žižek to an explicit engagement with Christianity and how both his earlier and more recent works are relevant for theological reflection.

On Futurity J. Martinon, 2007-06-20 This book explores how deconstruction addresses the issue of futurity in the act of writing and translation. It focuses on three French expressions: *venue survenue* and *voir venir*, taken from the work of Jacques Derrida, Jean-Luc Nancy, and Catherine Malabou, and offers fresh insights proposing the possibility of a multiplicity of structures.

After the Postsecular and the Postmodern

Anthony Paul Smith, Daniel Whistler, 2010-02-19 Continental philosophy of religion has been dominated for two decades by postsecular and postmodern thought. This volume brings together a vanguard of scholars to ask what comes after the postsecular and the postmodern—that is, what is Continental philosophy of religion now? Against the subjugation of philosophy to theology, *After the Postsecular and the Postmodern: New Essays in Continental Philosophy of Religion* argues that philosophy of religion must either liberate itself from theological norms or mutate into a new practice of thinking in order to confront the challenges religion presents for our time. The essays do not propose a new orthodoxy but set the stage for new debates by reclaiming a practice of philosophy of religion that recovers and draws on the insights of a distinctly modern tradition. Continental philosophy confronts the challenge of rethinking the secular in the light of the postsecular event and calls for a move from strictly critical to speculative thought in order to experiment with what philosophy can do. This collection of essays is indispensable for anyone interested in the relationship between philosophy and theology, political questions regarding religion, and in what contemporary speculative Continental philosophy has to add to philosophy of religion.
