Building W. B. Yeats's Later Poetry Tomoko Iwatsubo, 2024-09-09 This book explores Yeats's later poetry through the metaphor of the poetic tower where different kinds of building architectural textual political and symbolic were closely interrelated It chronologically examines Yeats's tower poems composed during a period of dramatic personal and national transformation from 1915 to 1932 Within a year after the Easter Rising in Dublin Yeats acquired a half ruined Norman tower in County Galway Ireland which had enthralled him for the past two decades and textually and architecturally constructed it into a focus of his life and work Interweaving the account of the renovation of the actual building and the textual construction in the socio historical contexts the book reveals the evolution of Yeats's multiplex tower as an organizing principle of his later poetry Using the archive of correspondence and manuscript materials of relevant poems including those which have thus far escaped close attention the book offers close textual genetic analyses and a diachronic view of Yeats's tower poetry which with its foundations laid decades earlier he built in the collections from *The Wild Swans at Coole* 1919 to *The Winding Stair and Other Poems* 1933 Highlighting the delicate exchange between poetry and biography as well as between the textual architecture and the actual one identifying a turning point in the making of each tower oriented poem and proposing some draft dating revisions this first book length systematic study on the process of Yeats's creation of the tower casts an unfamiliar light on a familiar yet underexplored landmark in modern poetry and makes his step by step construction work come alive

The Early Modern Travels of Manchu Mårten Söderblom Saarela, 2020-06-19 A linguistic and historical study of the Manchu script in the early modern world Manchu was a language first written down as part of the Qing state building project in Northeast Asia in the early seventeenth century After the Qing invasion of China in 1644 and for the next two and a half centuries Manchu was the language of state in one of the early modern world's great powers Its prominence and novelty attracted the interest of not only Chinese literati but also foreign scholars Yet scholars in Europe and Japan and occasionally even within China itself were compelled to study the language without access to a native speaker Jesuit missionaries in Beijing sent Chinese books on Manchu to Europe where scholars struggled to represent it in an alphabet compatible with Western pedagogy and printing technology In southern China meanwhile an isolated phonologist with access to Jesuit books relied on expositions of the Roman alphabet to make sense of the Manchu script When Chinese textbooks and dictionaries of Manchu eventually reached Japan scholars there used their knowledge of Dutch to understand Manchu In *The Early Modern Travels of Manchu* Mårten Söderblom Saarela focuses on outsiders both within and beyond the Qing empire who had little interaction with Manchu speakers but took an interest in the strange new language of a rising world power He shows how through observation inference and reference to received ideas on language and writing intellectuals in southern China Russia France Chosŏn Korea and Tokugawa Japan deciphered the Manchu script and explores the uses to which it was put for recording sounds and arranging words

Architecture after God Kyle Dugdale, 2022-12-19 *Architecture after God* A vivid

retelling of the biblical story of Babel leads from the contested site of Babylon to the soaring towers of the modern metropolis and sets the bright hopes of early modernism against the shadows of gathering war Dealing in structural metaphor utopian aspiration and geopolitical ambition Dugdale exposes the inexorable architectural implications of the event described by Nietzsche as the death of God The Exploring Architecture series makes architectural scholarship accessible introduces the latest research methods and covers a wide range of periods regions and topics Critical reappraisal of early modernism Based on the fable The Emperor and the Architect 1924 by Uriel Birnbaum New volume in the Exploring Architecture series

 Bookmaker** ,1885 **Modern Architecture: A Very Short Introduction** Adam Sharr,2018-11-15 Somewhere between
 1910 and 1970 architecture changed Now that modern architecture has become familiar sometimes celebrated sometimes
 vilified it s hard to imagine how novel it once seemed Expensive buildings were transformed from ornamental fancies which
 referred to the classical and medieval pasts into strikingly plain reflections of novel materials functions and technologies
 Modern architecture promised the transformation of cities from overcrowded conurbations characterised by packed slums

and dirty industries to spacious realms of generous housing and clean mechanised production set in parkland At certain times and in certain cultures it stood for the liberation of the future from the past This Very Short Introduction explores the technical innovations that opened up the cultural and intellectual opportunities for modern architecture to happen Adam Sharr shows how the invention of steel and reinforced concrete radically altered possibilities for shaping buildings transforming what architects were able to imagine as did new systems for air conditioning and lighting While architects weren't responsible for these innovations they were among the first to appreciate how they could make the world look and feel different in connection with imagery from other spheres like modern art and industrial design Focusing on a selection of modern buildings that also symbolize bigger cultural ideas Sharr discusses what modern architecture was like why it was like that and how it was imagined Considering the work of some of the historians and critics who helped to shape modern architecture he demonstrates how the field owes as much to its storytellers as to its buildings ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Modern Architecture Adam Sharr, 2018 Adam Sharr tells the story of how modern architecture developed and produced its powerful cultural images Considering the new building materials and techniques which shaped the movement such as innovations in steel and concrete and the advent of air conditioning he concludes by asking whether contemporary architecture remains modern at heart

[Reading the Gravestones of Old New England](#) John G.S. Hanson, 2021-11-08 The graveyards of old New England hold an incredible range of poetic messages in the epitaphs etched into the gravestones each a profound expression of emotion culture religion and literature These epitaphs are old but their themes are timeless mourning and faith grief and hope loss and memory This book tells the story of a years long walk among gravestones and shares insights gained along the way It identifies the source texts and authors chosen for these stones interprets something of the tastes and beliefs of the people who did the choosing offers some hypotheses on the various ways these texts were accessible to readers in remote towns and villages gives a brief summary of the religious context of the times and reflects on how the language and literature chosen for these epitaphs express these peoples conflicted and evolving attitudes towards life death and eternity
