From Comrade To Citizen The Struggle For Political Rights In China:

From Comrade to Citizen Merle Goldman, 2007-09-30 A leading scholar of China's modern political development examines the changing relationship between the Chinese people and the state. Correcting the conventional view of China as having instituted extraordinary economic changes but having experienced few political reforms in the post Mao period, Merle Goldman details efforts by individuals and groups to assert their political rights. China's move to the market and opening to the outside world have loosened party controls over everyday life and led to the emergence of ideological diversity. Starting in the 1980s, multi-candidate elections for local officials were held and term limits were introduced for communist party leaders. Establishment intellectuals who have broken away from party patronage have openly criticized government policies. Those intellectuals outside the party structures, because of their participation in the Cultural Revolution or the 1989 Tiananmen Square demonstrations, have organized petitions, published independent critiques, formed independent groups, and even called for a new political system. Despite the party's repeated attempts to suppress these efforts, awareness about political rights has been spreading among the general population. Goldman emphasizes that these changes do not guarantee movement toward democracy, but she sees them as significant and genuine advances in the assertion of political rights in China.

Reconsidering Chinese Citizenship Canglong Wang, Zhenzhou Zhao, Zhonghua Guo, 2025-04-03 This book reconsiders the concept of Chinese citizenship through the lens of cultural traditions and their deep historical roots. It challenges the state's monolithic interpretation of culture, exploring how cultural practices influence citizenship in modern China. The contributors to this volume examine how various actors, from government forces to grassroots activists, engage in culture-informed citizenship practices. They highlight the role of political ideology, spirituality, Confucianism, and minority religious traditions in shaping citizenship discourse. By broadening the understanding of Chinese citizenship beyond its Western-centric frameworks, this book delves into issues of socioeconomic injustice, cultural recognition, and the negotiation of civic rights. Readers are offered new perspectives on how China's unique cultural heritage intertwines with its political structures, providing a nuanced understanding of citizenship in rapidly changing societies. This thought-provoking analysis will engage anyone interested in Chinese politics, culture, and the development of citizenship in a global context. The chapters in this book were originally published as a special issue of *Citizenship Studies*.

China's Modernization II Gerhard Preyer, 2015-09-09 The idea of only one way leading to a modern society seems to be hardly tenable. But even if we agree to this, our theories and terms describing modernization are gained on our own Western history. So social science has to reconsider its basic terms to describe China's modernization and maybe even the understanding of modernization itself. The second of two volumes on China's modernization collects articles by leading Chinese and Western scientists focusing on the main conflicts and differences this process involves. In the first section, *On Contemporary Theory of Modernization*, Manussos Marangudakis

represents Shmuel N Eisenstadt's concept of Multiple Modernities and the Theory of Indeterminacy one of the best elaborated perspectives on modernity Changing China Dealing with Diversity the second section examines how China copes with dissent and discusses the significance of law and a civil society Merle Goldman begins with Dissent of China's Public Intellectuals in the Post Mao Era The Modernization of Law in China its Meaning Achievements Obstacles and Prospect is the subject of Qingbo Zhang Scott Wilson presents a Gramscian analysis of civil society in China's State in the Trenches And Francis Schortgen and Shalendra Sharma study how China is Manufacturing Dissent Domestic and International Ramifications of China's Summer of Labor Unrest Neoliberalism and the Changes in East Asian Welfare and Education is the focus of the third section Beatriz Carrillo Garcia investigates the Business Opportunities and Philanthropic Initiatives in China Time Politics and Homelessness in Contemporary Japan is the subject of Ritu Vij Different school books show the Educational Modernisation Across the Taiwan Straits by David C Schak And Ho fung Hung discusses the role of China in globalization following the question Is China Saving Global Capitalism from the Global Crisis The additional rubric On Contemporary Philosophy involves three articles about International Development Paradox and Phronesis by Robert Kowalski The World in the Head by Robert Cummins and Communication Cooperation and Conflict by Steffen Borge Content and abstracts www.protosociology.de

Manipulating Authoritarian Citizenship Samantha A. Vortherms, 2024-10-15 The redistribution of political and economic rights is inherently unequal in autocratic societies Autocrats routinely divide their populations into included and excluded groups creating particularistic citizenship through granting some groups access to rights and redistribution while restricting or denying access to others This book asks why would a government with powerful tools of exclusion expand access to socioeconomic citizenship rights And when autocratic systems expand redistribution whom do they choose to include In *Manipulating Authoritarian Citizenship* Samantha A Vortherms examines the crucial case of China where internal citizenship regimes control who can and cannot become a local citizen through the household registration system hukou and uncovers how autocrats use such institutions to create particularistic membership in citizenship Vortherms shows how local governments explicitly manipulate local citizenship membership not only to ensure

political security and stability but also crucially to advance economic development Vortherms demonstrates how autocrats use differentiated citizenship to control degrees of access to rights and thus fulfill the authoritarian bargain and balance security and economic incentives This book expands our understanding of individual state relations in both autocratic contexts and across a variety of regime types

Protest and Resistance in the Chinese Party State Hank Johnston, Sheldon Zhang, 2022-02-24 Although contemporary China is a repressive state protests and demonstrations have increased almost tenfold between 2005 and 2015 This is an astounding statistic when one considers that Marxist Leninist regimes of the past tolerated little or no public dissent How can protests become so common in an autocratic state What are the trends of repression and mobilization This collection helps to answer these compelling questions through in depth analyses of several Chinese protest movements and state responses The chapters examine the opportunities and constraints for protest mobilization and explains their importance for understanding contemporary Chinese society

Competing Economic Paradigms in China Steven Mark Cohn, 2017-09-05 When the Chinese economic reforms began in 1978 Marxist economics infused all the institutions of economic theory in China from academic departments and economics journals to government departments and economic think tanks By the year 2000 neoclassical economics dominated these institutions and organized most economic discussion This book explains how and why neoclassical economic theory replaced Marxist economic theory as the dominant economics paradigm in China It rejects the idea that the rise of neoclassical theory was a triumph of reason over ideology and instead using a sociology of knowledge approach links the rise of neoclassical economics

to broad ideological currents and to the political economic projects that key social groups inside and outside China wanted to enable The book concludes with a discussion of the nature of economic theory and economics education in China today

Chinese Intellectuals Between State and Market Merle Goldman,Edward Gu,2005-08-03 This edited volume describes the intellectual world that developed in China in the last decade of the twentieth century How as China s economy changed from a centrally planned to a market one and as China opened up to the outside world and was

influenced by the outside world Chinese intellectual activity became more wide ranging more independent more professionalized and more commercially oriented than ever before The future impact of this activity on Chinese civil society is discussed in the last chapter

The New Rich in China David Goodman, 2008-05-07 Three decades of reform since 1978 in the People's Republic of China have resulted in the emergence of new social groups which have included new occupations and professions generated as the economy has opened up and developed and most spectacularly given the legacy of state socialism the identification of those who are regarded as wealthy However although China's new rich are certainly a consequence of globalization there remains a need for caution in assuming either that China's new rich are a middle class or that if they are they should immediately be equated with a universal middle class Including sections on class status and power agency and structure and lifestyle The New Rich in China investigates the political socio economic and cultural characteristics of the emergent new rich in China the similarities and differences to similar phenomenon elsewhere and the consequences of the new rich for China itself In doing so it links the importance of China to the world economy and helps us understand how the growth of China's new rich may influence our understanding of social change elsewhere This is a subject that will become increasingly important as China continues its development and private entrepreneurship continues to be encouraged and as such The New Rich in China will be an invaluable volume for students and scholars of Chinese studies history and politics and social change

Allies of the State Jie Chen, Bruce J. Dickson, 2010-06-15 Allies of the State is a finely tuned laser of a book With a rigorous yet elegant research design deployed with great dexterity the argument unfolds in tantalizing layers as Chen and Dickson get us closer than ever to understanding the political attitudes and behavior of China's private entrepreneurs Scott Kennedy author of The Business of Lobbying in China

Law and Politics in Modern China Sharron Gu, 2009 This is an original interdisciplinary study of Chinese law its language and political institution Evolving within a complex literary framework over thousands of years Chinese language has lost its conceptual distinctiveness to its multilevel and overlapping meanings and connotations Chinese law has become inflated with contrary rulings and exceptions This mass of rules requires an extra lingual legal authority to redefine boundaries and specify applications This book follows and continues the author's The Boundaries of Meaning and the Formation of Law McGill University Press by illustrating how language shapes the formation application and administration of law in various cultural environments Law and Politics in Modern China is an important book for those interested in Chinese history culture law and politics It also provides refreshing insights about the way that law continues to function after its language matures and creates contradictions and loopholes within its system of rules one of the most important issues facing Western legal administration in the immediate future

The Prospects for Liberal Nationalism in Post-Leninist States Cheng Chen, 2007-08-27 The fall of communism in the Soviet Union led many to hope and expect that liberal democracy would immediately take root across postcommunist states marking what Francis Fukuyama famously referred to as the end of

history Since then however a very different picture has emerged most notably in the form of nationalist sentiments that have steered many postcommunist countries in an illiberal direction even in regimes committed to market reforms and formally democratic institutions Cheng Chen examines this phenomenon in comparative perspective showing that the different pathways of nation building under Leninism affected the character of Leninist regimes and later the differential prospects for liberal democracy in the postcommunist era In China and Russia Chen shows liberalism and nationalism were more difficult to reconcile because Leninism was indigenous and had a more significant impact on nation building In Hungary and Romania by contrast Leninism was a foreign import and had less of an effect on traditional national identity As we witness the struggle to establish democracy in places such as Afghanistan and Iraq a study that examines the salience of historical legacies seems particularly timely
