Halé, 1995-12-28 A blueprint for change from a leading international expert on process redesign Rapid unrelenting all encompassing change and uncertainty are the only constants in business today and the most successful organizations aren't the ones that have learned how to simply cope with change but the ones that actually thrive on it In this book Jacques Hale outlines a dynamic new approach to process redesign and a set of proven techniques for transforming change from a potential hazard to a powerful strategic weapon in the war for market share With the help of real life case studies Hale demonstrates how many leading companies have successfully used his techniques to become or remain the leaders in their respective industries And he provides managers with a comprehensive blueprint for making rapid process redesign work in any type of business for increased profits and productivity A leading intentional expert on business process redesign arms managers with a systematic approach to designing implementing and monitoring major changes throughout any type of business Features real life success stories of leading companies world wide that have used the techniques to master change in their organizations JACQUES HALE Bournemouth England is a business process redesign expert with the prestigious international consulting firm Business Concepts International Ltd Method Engineering Sjaak Brinkkemper, Kalle Lyytinen, Richard Welke, 2013-06-05 Method Engineering focuses on the design construction and evaluation of methods techniques and support tools for information systems development It addresses a number of important topics including method representation formalisms meta modelling situational methods contingency approaches system development practices of method engineering terminology and reference models ontologies usability and experience reports and organisational support and impact *Knowledge Management and Competitive Advantage: Issues and Potential Solutions* Chilton, Michael A., 2013-10-31 This book examines current research in support of knowledge management by focusing on how knowledge resources can be used to create and sustain competitive advantages combining imitation and innovation theories Provided by publisher **Dynamic Strategy** Lalit Manral, 2025-09-26 This book explains the dynamic processes of strategic management through scientific theorizing of the temporal heterogeneity of profit seeking firms strategic behavior The theoretical explanation of dynamic strategy provided herein which is not without significant normative implications captures the inherent paradox of dynamic strategy That a stream of dynamically inconsistent elemental actions of dynamic strategy which are inextricably linked to the fundamental drivers of enterprise value in dynamic competitive environments is requisite to achieve dynamically consistent returns over the firm's lifetime The implementation challenge for a firm seeking to achieve its intended objective lies in comprehending and managing the dynamic interplay among the processes outside and within the firm that co create the dynamic context of the continuously emerging stream of strategic actions which are elemental to dynamic strategy and their performance outcomes The book applies evolutionary theory to provide an alternative

conceptualization of firms temporal modification of strategic behavior The explanatory framework is that of a quasi Darwinian evolution by economic selection as opposed to the Darwinian evolution by natural selection A quasi Darwinian evolutionary theory of dynamic strategy which situates the strategizing firm in an economic population of profit seeking firms conceptualizes dynamic strategy both as a determinant driver and an outcome product of hybrid as opposed to top down artificial or bottom up natural economic evolution Catering to scholars in strategic management with appeal to most management sub disciplines this work provides researchers with the conceptual wherewithal to both formally and empirically model a wide variety of phenomena in dynamic industrial settings
