From Liotard to Le Corbusier ,1988 **From Liotard to Le Corbusier** Hans Ulrich Jost,Brandon Brame Fortune,William Hauptman,Schweizerisches Institut für Kunstwissenschaft,1988 Analyse Notices sur François Boccione 1828 1890 Alexandre Calame 1810 1864 Louis Ducros 1748 1810 Charles Gleyre 1806 1874 Jacques Sablot 1749 1803 Félix Vallotton 1865 1925 **From Liotard to Le Corbusier** ,1988 *A Selective Bibliography of Works on Le Corbusier Published in the 1980s* Christopher E. M. Pearson,1994 **A Selective List of Works on Le Corbusier Published in the 1980's** Christopher E. M. Pearson,1991 Le Corbusier, the Noble Savage Adolf Max Vogt,Le Corbusier,1998 Vogt's investigation of Le Corbusier's early life and education not only reveals important previously unacknowledged influences on specific projects such as the League of Nations headquarters and the Villa Savoye but also suggests why Le Corbusier throughout his career preferred to lift buildings above the ground to give them the appearance of floating This tendency had decisive consequences for buildings associated with the modern movement and continues to influence architecture today **A Contested Nation** Oliver Zimmer,2003-07-10 This book examines the ways in which the Swiss defined their national identity in the long nineteenth century in the face of a changing domestic and international background Its narrative begins in 1761 when the first Swiss patriotic society of national significance was founded and ends in 1891 when the Swiss celebrated their 600 year existence as a nation in a monumental national festival While conceding that the creation of a nation state in 1848 marked a watershed in the history of Swiss nation formation the author does not focus one sidedly as many others have done on the activities of the nationalizing state Instead he attributes a key role to the competitive and contentious struggles over the shaping of public institutions and over the symbolic representation of the nation These struggles to which the nation state and civil society contributed in equal measure were framed increasingly along national lines Historical Dictionary of Switzerland Leo Schelbert,2014-05-21 Switzerland's exceptional scenic beauty of valleys lakes and mountains its central location on international trade routes and its world famous banking system are just a few elements that have contributed to its rise in the global market It consists of twenty six member states called cantons and it's actively engaged in the maintenance of peace among nations The history of the Swiss Confederation is as rich and varied as its culture and people This updated second edition of Historical Dictionary of Switzerland features the nation's multicultural and democratic traditions and institutions its complex history and its people's involvement in past and present world affairs This is done through a list of abbreviations and acronyms a chronology an introduction appendixes maps a bibliography and over 500 cross referenced dictionary entries on important persons places events and institutions as well as significant political economic social and cultural aspects This book is an excellent access point for students researchers and anyone who wants to know more about Switzerland **A Sourcebook of Gauguin's Symbolist Followers** Russell T. Clement,Annick Houzé,Christiane Erbolato-Ramsey,2004-06-30 Paul Gauguin 1848 1903 played a seminal role in Post Impressionist France In

his writings and work he favored emotional responses to nature over intellectual uses of lines color and composition In 1888 he and Emile Bernard developed a new style called Synthetism Three groups of Gauguin s symbolist followers Pont Aven Les Nabis and Rose Croix pursued and extended the Synthetist vision This sourcebook focuses on the most prominent adherents of the three schools directly affected by Gauguin s symbolism This is the first comprehensive single volume guide and bibliography of artists in these three important French avant garde movements This work covers the entire careers of 16 artists by providing biographical sketches chronologies citations to primary and secondary literature and exhibitions

What Is a Nation? Timothy Baycroft, Mark Hewitson, 2006-06-29 This volume analyses and compares different forms of nationalism across a range of European countries and regions during the long nineteenth century It aims to put detailed studies of nationalist politics and thought which have proliferated over the last ten years or so into a wider European context By means of such contextualization together with new and systematic comparisons What is a Nation Europe 1789 1914 reassesses the arguments put forward in the principal works on nationalism as a whole many of which pre date the proliferation of case studies in the 1990s and which as a consequence make only inadequate reference to the national histories of European states The study reconsiders whether the distinction between civic and ethnic identities and politics in Europe has been overstated and whether it needs to be replaced altogether by a new set of concepts or types What is a Nation explores the relationship between this and other typologies relating them to complex processes of industrialization increasing state intervention secularization democratization and urbanization Debates about citizenship political economy liberal institutions socialism empire changes in the states system Darwinism high and popular culture Romanticism and Christianity all affected and were affected by discussion of nationhood and nationalist politics The volume investigates the significance of such controversies and institutional changes for the history of modern nationalism as it was defined in diverse European countries and regions during the long nineteenth century By placing particular nineteenth century nationalist movements and nation building in a broader comparative context prominent historians of particular European states give an original and authoritative reassessment designed to appeal to students and academic readers alike of one of the most contentious topics of the modern period **Jean-Etienne Liotard** Royal Academy of Arts (Great Britain), 2015 Jean Etienne Liotard was renowned during the eighteenth century for his exquisite portraits and works in pastel not to mention his outlandish Oriental garb He painted some of the most significant rulers and aristocrats of Europe including several members of the British royal family A peripatetic artist who worked in the Levant as well as major European capitals Liotard was born in Geneva and studied in Paris before travelling to Italy and then on to Constantinople in the train of British aristocratic Grand Tourists There he painted the local residents as well as the British community and adopted the eccentric style of dress that when he later visited London caused him to become known as The Turk This volume illuminates the career of this remarkable but now little known artist showcasing a variety of his extraordinary works including portraits drawings and
