

Figure 2: Overview of our proposed MaPLe (Multi-modal Prompt Learning) framework for prompt learning in V-L models. MaPLe tunes both **vision** and **language** branches where only the **context prompts** are learned, while the rest of the model is frozen. MaPLe conditions the vision prompts on language prompts via a V-L coupling function  $\mathcal{F}$  to induce mutual synergy between the two modalities. Our framework uses **deep contextual prompting** where separate context prompts are learned across multiple transformer blocks.

## **From Models To Modules:**

**Model Theory and Modules** Mike Prest, 1988-02-25 In recent years the interplay between model theory and other branches of mathematics has led to many deep and intriguing results In this the first book on the topic the theme is the interplay between model theory and the theory of modules The book is intended to be a self contained introduction to the subject and introduces the requisite model theory and module theory as it is needed Dr Prest develops the basic ideas concerning what can be said about modules using the information which may be expressed in a first order language Later chapters discuss stability theoretic aspects of modules and structure and classification theorems over various types of rings and for certain classes of modules Both algebraists and logicians will enjoy this account of an area in which algebra and model theory interact in a significant way The book includes numerous examples and exercises and consequently will make an ideal introduction for graduate students coming to this subject for the first time

**Model Theory of Modules, Algebras and Categories** Alberto Facchini, Lorna Gregory, Sonia L'Innocente, Marcus Tressl, 2019-05-31 This volume contains the proceedings of the international conference Model Theory of Modules Algebras and Categories held from July 28 August 2 2017 at the Ettore Majorana Foundation and Centre for Scientific Culture in Erice Italy Papers contained in this volume cover recent developments in model theory module theory and category theory and their intersection

**GIS Modules and Distributed Models of the Watershed** Task Committee on GIS Modules and Distributed Models of the Watershed, 1999-01-01 Prepared by the Task Committee on GIS Modules and Distributed Models of the Watershed of ASCE This report guides professionals in selecting the most advantageous applications of geographic information system GIS modules and distributed models for watershed runoff Recent advances in technology offer hydrologic engineers watershed managers and data collection agencies unprecedented capabilities for storing and manipulating data With the advent of Digital Elevation Models DEM Triangulated Irregular Networks TIN Digital Line Graphs DLG and GIS software the use of watershed modeling among industry professionals has increased at an incredible rate With this growth it is increasingly difficult for practitioners to choose the most effective use of the technology This report identifies state of the art GIS hydrology analysis software and techniques as well as GIS types and map projections It covers data commonly required for hydrologic analysis limitations of available data and the integration of watershed hydrological analysis software and GIS techniques The appendix highlights nine examples of watershed modeling systems including the Watershed Modeling System WMS the Soil and Water Assessment Tool SWAT and the Hydrologic Model CASC2D

**Models, Modules and Abelian Groups** Rüdiger Göbel, Brendan Goldsmith, 2008-12-10 This is a memorial volume dedicated to A L S Corner previously Professor in Oxford who published important results on algebra especially on the connections of modules with endomorphism algebras The volume contains refereed contributions which are related to the work of Corner It contains also an unpublished extended paper of Corner himself A memorial volume with important contributions related to algebra

*Design to Resource Management for Distributed Embedded Systems* Bernd Kleinjohann, Lisa Kleinjohann, Ricardo J. Machado, Carlos Pereira, P.S. Thiagarajan, 2007-01-29 Embedded computing systems have started to carry out the key control functions in diverse domains such as telecommunications automotive electronics avionics and even complete industrial manufacturing lines Traditionally such embedded control systems have been implemented in a monolithic centralized manner However distributed and parallel solutions have been steadily gaining popularity In a distributed setup the control task is carried out by a number of controllers distributed over the entire system and interconnected as a network by communication components such as field buses More demanding local control applications require controllers based on parallel architectures or processors with dedicated co processors Distribution and parallelism in embedded system design increase the engineering challenges and demand new development methods and tools From Model Driven Design to Resource Management for Distributed Embedded Systems contains 16 original contributions as well as 12 invited papers by distinguished invited speakers These papers were presented at the Working Conference on Distributed and Parallel Embedded Systems DIPES 2006 which was held in October 2006 in Braga Portugal and sponsored by the International Federation for Information Processing IFIP This volume covers the following very timely topics model driven design test and evolution of embedded systems timing analysis and predictability scheduling allocation communication and resource management in distributed real time systems The Neural Simulation Language Alfredo Weitzenfeld, Michael A. **Models of Understanding Text** Bruce K. Britton, Arthur C. Graesser, 2014-02-25 What is text understanding It is the dynamic process of constructing coherent representations and inferences at multiple levels of text and context within the bottleneck of a limited capacity working memory The field of text and discourse has advanced to the point where researchers have developed sophisticated models of comprehension and identified the particular assumptions that underlie comprehension mechanisms in precise analytical or mathematical detail The models offer a priori predictions about thought and behavior not merely ad hoc descriptions of data Indeed the field has evolved to a mature science The contributors to this volume collectively cover the major models of comprehension in the field of text and discourse Other books are either narrow covering only a single theoretical framework or do not focus on systematic modeling efforts In addition this book focuses on deep levels of understanding rather than language codes syntax and other shallower levels of text analysis As such it

provides readers with up to date information on current psychological models specified in quantitative or analytical detail
