

### **Transition from Social philosophy to Sociology**

Sociology is one of the newer academic disciplines, tracing its origins no further back than the middle of the nineteenth century. It has a short history. Sociology, the science of society, is the youngest and it came to be established only in the nineteenth century. The French philosopher, Auguste Comte gave sociology and a programme for its development. For thousands of years, society has been a subject for speculation and enquiry. Yet sociology is modern science that originated only within the last hundred eighty-one years or so.

The study of society, however, can be traced to the Greek philosophers, Plato and Aristotle. The philosophical basis of Plato and Aristotle characterized the observations of man for a very long period of time. The literature concerning society and its problems found a place in the Republic of Plato (427-347 B.C.) and in the Politic and Ethics of Aristotle (388-327 B.C.).

Plato was the first Western philosopher who attempted a systematic study of society. In the Ethics and Politics of Aristotle, we find the first major attempts of systematic dealing of law, the society and State.

In the sixteenth century, a precise distinction was made between State and society. Thomas Hobbes and Machiavelli were outstanding contributors to the realistic approach to social problems. Hobbes in his Levithan and Machiavelli in his Prince analyses the system of statecraft and also put forward conditions for the success of the State.

Eighteenth-century Europe witnessed the publication of a number of great works of observation, for example, Rousseau's social contract and Montesquieu's De l'esprit des lois. These writings were still in the philosophical tradition, but they contained sufficient analysis to lay the foundation for a separate social science.

Various social sciences gradually evolved in response to the varied needs of human living. The writings in the philosophical tradition laid the foundation for the development of social sciences. With the passage of time, various social sciences developed one after another and began to pursue
