### *Innovations in Bio-Inspired Computing and Applications* Ajith Abraham,Mrutyunjaya Panda,Subhrajit Pradhan,Laura Garcia-Hernandez,Kun Ma,2020-08-05

This book highlights recent research on bio inspired computing and its various innovative applications in information and communication technologies It presents 38 high quality papers from the 10th International Conference on Innovations in Bio Inspired Computing and Applications IBICA 2019 and 9th World Congress on Information and Communication Technologies WICT 2019 which was held at GIET University Gunupur India on December 16 18 2019 As a premier conference IBICA WICT brings together researchers engineers and practitioners whose work involves bio inspired computing computational intelligence and their applications in information security real world contexts etc Including contributions by authors from 18 countries the book offers a valuable reference guide for all researchers students and

practitioners in the fields of Computer Science and Engineering Mira, Alberto Prieto, 2003-06-29 Underlying most of the IWANN calls for papers is the aim to reassume some of the motivations of the groundwork stages of biocybernetics and the later bionics formulations and to try to reconsider the present value of two basic questions. The first question is What does neuroscience bring into computation? The new bionics. That is to say how can we seek inspiration in biology? Titles such as computational intelligence, artificial neural nets, genetic algorithms, evolutionary hardware, evolutive architectures, embryonics, sensory and morphic systems, and emotional robotics are representatives of the present interest in biological electronics bionics. The second question is What can return computation to neuroscience? That is to say how can mathematics, electronics, computer science, and artificial intelligence help the neurobiologists to improve their experimental data modeling and to move a step forward towards the understanding of the nervous system. Relevant here are the general philosophy of the IWANN conferences, the sustained interdisciplinary approach and the global strategy again and again to bring together physiologists and computer experts to consider the common and pertinent questions and the shared methods to answer these questions.
