Hittle, 2003-04-30 Control Systems for Heating Ventilating and Air Conditioning Sixth Edition is complete and covers both hardware control systems and modern control technology The material is presented without bias and without prejudice toward particular hardware or software Readers with an engineering degree will be reminded of the psychrometric processes associated with heating and air conditioning as they learn of the various controls schemes used in the variety of heating and air conditioning system types they will encountered in the field Maintenance technicians will also find the book useful because it describes various control hardware and control strategies that were used in the past and are prevalent in most existing heating and air conditioning systems Designers of new systems will find the fundamentals described in this book to be a useful starting point and they will also benefit from descriptions of new digital technologies and energy management systems This technology is found in modern building HVAC system designs

Maritime Skills on Vessels & Shore - The STCW Convention's Relevance & Recommendations Dr. (Capt.) Vivek Jain, 2023-07-11 This Book is of the seafarers by the seafarers for the seafarers Seafarers are the core of all maritime trade and their expectations perspectives alone should be at the centre of all solutions for maritime skills Taking this standpoint the editor has explored the issues of maritime skills with critical gaps following a framework of research methodology The issue of critical gaps in maritime skills is further exacerbated due to the impact on seafarers caused by changes in the ecosystem status relationship with stakeholders technology focus on renewable energy anxiety levels and so forth Furthermore stakeholders can no longer ignore the fact that seafarers are leaving a seagoing

career after working for only a few years Therefore the editor has also explored the need to prepare seafarers for transition into maritime shore jobs to preserve their maritime skills within the maritime industry This exhaustive book can be used as a guide for further revisions or a revamp of the current STCW Convention The editor thereafter divided the researched critical gaps in maritime skills into four groups Jain s Model for Maritime Skills Panoptic Social Intelligence Upskilling Reskilling for onboard vessels skills and Portable Skills for future shore jobs Panoptic and Social Skills are core skills required for both on board vessels as well for maritime shore jobs Thereafter the editor embarked on a voyage to discover persuade collaborate with a number of exceptionally experienced subject matter experts over many months to collaboratively pursue many mini research projects across all selected maritime skills adopting specific methodology to plug these critical gaps These experts were drawn 1 from countries such as India the Philippines Romania South Korea Malaysia UAE the UK and Singapore 2 from both genders 3 from deck engine professionals settled ashore 4 with current experience in the industry and or at sea at a fundamental level and 5 from seafaring supplying nations recognising experiencing the relevant socio economic circumstances of seafarers From this book seafarers will not only find ideas on how to plug gaps in their maritime skills but also how they can transition with their existing skills to other maritime jobs such as marine superintendents marine managers designated persons ashore managers supervising new build second hand vessels IT managers in the maritime domain marine surveyors marine experts investigators marine pilots in ports maritime arbitrators managers in shipyards and so forth The solutions in this book will also resolve the issue of the shortage and retention of seafarers
