**Public Goods and the Fourth Industrial Revolution** Maria Płonka, 2022-06-14 The fourth industrial revolution characterized by digitization artificial intelligence and augmented reality and megatrends such as globalization urbanization demographic changes and the knowledge based economy will trigger a series of profound technological economic social and environmental changes that

will permanently and irreversibly change the role of the state in meeting social needs Industry 4.0 will also change the type, nature and scope of public goods and how they are produced, financed, delivered and consumed. This book redefines the current paradigm of public goods. It proposes a model of production and distribution of public goods that acknowledges the participation of entities from the public, private and nonprofit sectors. The authors argue that these entities would participate in the production, financing, distribution and consumption of such goods. From a theoretical point of view, such an inclusive approach involving the expansion of the classical state-market dichotomy with new entities including citizens themselves leads to a new conceptualization and approach towards public goods. The model assumes shared responsibility, subsidiarity and paternalistic libertarianism and it allows the state to create new entities of an educational or fiscal nature while remaining the regulator of public services and distribution. Additionally, the book analyzes changes regarding the perception of public goods in the era of the fourth industrial revolution across selected sectors such as healthcare and pension systems, education, local public goods and public utility services. The book is primarily addressed to researchers, scholars and students across social and technical sciences and it will also be a useful guide for central and local administration bodies responsible for public policy. Chapters 4, 5 and 6 of this book are available for free in PDF format as Open Access from the individual product page at [www.routledge.com](http://www.routledge.com). *Revolutionary Philanthropy* Stuart Finkel, 2024-07-15

In late nineteenth-century Russia, a series of organizations emerged from the nascent radical liberationist movement for the purposes of providing aid to political prisoners and exiles. Those leading these endeavors framed them as a philanthropic exercise that was paradoxically

always also political provocatively appropriating the name and humanitarian mission of the Red Cross for their illicit attempts to assist the enemies of the Tsarist state These efforts provided a unifying thread to the fractious and fragmented revolutionary movement over years and even decades The unjustly persecuted political prisoner or exile came to serve as a powerful synecdoche for the tyranny of the autocratic state while assisting these suffering martyrs came to be legible as an indisputably noble act across political and even national boundaries Revolutionary Philanthropy the first book in any language to provide a comprehensive portrait of the origins of these organizations posits that the groupings that undertook aid to political prisoners and exiles emerged through gradually accrued shared practices within a series of constantly evolving overlapping domestic and international personal and political networks In bringing together two seemingly incompatible modes of social action radical politics and philanthropy these red cross activities came to form a vital connective tissue across party and ideological lines Moreover they connected the still small and isolated groupings of committed revolutionaries to a significantly wider circle of sympathizers both at home and abroad Within Russia this linked radicals to a significantly broader circle of liberals and politically uncommitted supporters while revolutionary migr s presented the Western public with a captivating narrative of heroic martyrs unjustly suffering for the cause While the strain of conflicting imperatives threatened on multiple occasions to unravel the entire affair in the end this very tension proved instrumental in making them durable Drawing on a wide range of archival sources in multiple languages some of which have not been consulted before **Liberty's Torch** Elizabeth Mitchell, 2014-07-02 Turns out that what you thought you knew about Lady Liberty is dead wrong Learn the truth in this fascinating account O The Oprah Magazine The Statue of Liberty is one of the most recognizable monuments in the world a powerful symbol of freedom and the American dream For decades the myth has persisted that the statue was a grand gift from France but now Liberty s Torch reveals how she was in fact the pet project of one quixotic and visionary French sculptor Fr d ric Auguste Bartholdi Bartholdi not only forged this 151 foot tall colossus in a workshop in Paris and transported her across the ocean but battled to raise money for the statue and make her a reality A young sculptor inspired by a trip to Egypt where he saw the pyramids and Sphinx he traveled to America carrying with him the idea of a colossal statue of a woman There he enlisted the help of notable people of the age including Ulysses S Grant Joseph Pulitzer Victor Hugo Gustave Eiffel and Thomas Edison to help his scheme He also came up with inventive ideas to raise money including exhibiting the torch at the Philadelphia world s fair and charging people to climb up inside While the French and American governments dithered Bartholdi made the statue a reality by his own entrepreneurship vision and determination By explaining Liberty s tortured history and resurrecting Bartholdi s indomitable spirit Mitchell has done a great service This is narrative history well told It is history that connects us to our past and hopefully to our future Los Angeles Times
