## **Further Education Governments Discourse Policy And Practice Killing A Paradigm Softly:**

Further Education, Government's Discourse Policy and Practice: Killing a Paradigm Softly Sandy Cripps, 2017-11-22 This title was first published in 2002 By exploring a public policy process in action during the period 1944 1999 this book traces the impact of policy to the institutional level where policy becomes practice The author investigates the development of the further education sector and reveals the process that helped shape its identity The book provides a benchmark combining theory with reality and evaluating current policy     *The Taming of Education* Rob Creasy, 2017-08-24 This book evaluates contemporary approaches to education with a particular focus on the ways in which assessment shapes the educational experience and influences pupils and students It adopts a critical approach arguing that there is a need for students to develop critical thinking skills be flexible and have the capacity for originality Education has increasingly come to be seen as a process with qualifications as the output however as economies change attaining advantage increasingly relies on creativity and originality Unfortunately in the quest to remove uncertainty from education creativity and originality are often overlooked and the result is that education is impoverished Creasy argues here that there is no single factor that has shaped education and led to this situation rather developments within education can be seen as having been shaped by a range of forces such as neoliberalism New Public Management standardization and internationalization This is not to claim any deliberate undermining of education but the cumulative effect is that education is less and less fit for purpose Written for anyone involved in education student teacher or manager this book draws upon Educations Studies Sociology and Social Policy to offer a compelling critique of contemporary education     **New Forms of Governing** P. Triantafillou, 2012-08-29 Triantafillou analyzes the changing ways of governing the public sector and the ways in which public organizations have become the target of interventions seeking to improve their efficiency and quality He exposes how political and social science theories were adopted in often unpredictable ways in the process of reforming the public sector     Bibliographic Guide to Education ,2002 lists publications cataloged by Teachers College Columbia University supplemented by The Research Libraries of The New York Public Library     *International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences* ,2002     *Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur* ,2003     *Boletín Internacional de Bibliografía Sobre Educación* ,2002     **The British National Bibliography** Arthur James Wells, 2002     *Books in Print Supplement* ,2002     *Forthcoming Books* Rose Army, 2002-04     **Bulletin of the Atomic Scientists** ,1987-06     *Bulletin of the Atomic Scientists* ,1998-03 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world     Arab Studies Journal ,2003     *Alternative Press Index* ,2001     **Policy, Discourse and Rhetoric** Marie Lall, 2012-09-11 This is not yet another book on New Labour and neoliberalism but the only book which uses policy case study

evidence to show the rhetorical nature of the commitment New Labour appeared to have been making to education Unlike other books on that era this one aims to review New Labour's time in government through specific policy texts This book reviews some of the major policy shifts in the education sector analysing selected case study policies in order to articulate dominant discourses in recent policy making which have helped establish a particular hegemony The book's originality lies in its policy analysis and case study base whereby key policy texts across different sectors are dissected using the policy cycle framework allowing for an in depth analysis of the policy discourse as well as a discussion on how the neoliberal agenda was reflected and or promoted Education is often only perceived as limited to policies relating to schools and higher education However the book seeks to demonstrate that education as a sector is a much broader field and therefore the areas covered include key policies in citizenship and youth work widening participation in higher education the place of inclusive education in the curriculum the undergraduate medical curriculum and the effect of the Cox review on creativity In effect the broad selection of sectors demonstrates that New Labour's education policies were not only detrimental in traditional education settings but also affected areas such as medicine and the media which are of importance to those who no longer are affected by what happens in institutions of learning and teaching The book is consequently relevant for a much wider audience beyond the education community
