

China on Campus: A Conversation with China Scholars of Asian Heritage

Dan Chen, *University of Richmond, USA*

Rongbin Han, *University of Georgia, USA*

John Yasuda, *Johns Hopkins University, USA*

Increasing tensions between the United States and China, a rise in anti-Asian sentiment, and the risk of government surveillance has dramatically altered the teaching and research contexts for scholars of Chinese politics. In this conversation, Dan Chen (University of Richmond), Rongbin Han (University of Georgia), and John Yasuda (Johns Hopkins University) discuss how questions of identity, politics, and security have affected classroom dynamics and their future research endeavors.

What is your institutional context? How are the politics of China taught at your university?

Dan: The University of Richmond is a private liberal arts institution with about 3,200 undergraduate students. We do not have a large cluster of faculty who teach classes on China or Asia more broadly. I'm the only person who teaches Chinese politics, which is typical for liberal arts colleges. Student interest in Chinese politics is driven by different motivations. For international students from China, they seek to "know the truth" about events that are censored at home. For American students, some take the course to fulfill their major requirements, whereas others have career aspirations in foreign service or immigration advocacy. Other students are driven by a general interest in China as a major power in global politics.

Rongbin: I joined the University of Georgia in 2013. University of Georgia is a public land-grant research university and Georgia's flagship institution, currently enrolling more than 40,000 graduate and undergraduate students. I am the only faculty member in my department who teaches Chinese politics at both graduate and undergraduate levels. Students take my courses for similar reasons as Dan's students. Although my university does not have an institutionalized platform centering on China studies (we have a Center for Asian Studies), I am lucky to be in the Atlanta area where a robust regional China Research Center allows me to connect with fellow scholars in the field.

John: At Johns Hopkins University, a private research university, there is broad interest in the study of China dispersed across a number of departments, including anthropology, East Asian studies, economics, history, political

science, and sociology. Close to a third of my students come from China and the rest hail from across the continental United States. Most of my enrollees have taken at least one other course on China or on East Asia. Students from China often cite an interest in the way that Western scholars view Chinese politics as a major reason for taking my course. Similar to Dan, my students from the United States have an expressed interest in pursuing careers in foreign service. There also has been a slight uptick in enrollments from students majoring in the sciences who simply want to gain additional insight on the China-related headlines of the day.

In what ways do you think people's perceptions of your ethnic or national identity affect the dynamics in your classes or your experience at academic conferences and public events? How would you like to see the problematic situations addressed?

Rongbin: Other than the rare instances in which I got yelled at on the street (twice since arriving in the United States in 2006), I have not encountered anything that is overly unpleasant. I feel fortunate that my experiences at academic conferences and public events have been "eventless" in this regard. My interaction with students has been smooth as well. In fact, my identity has likely affected the dynamics in a positive direction. Students perceive me as a reliable source on China. Probably due to my research on state censorship and the possible repercussions associated with doing research on "sensitive" topics, my students view me as a critical observer of the state. Many students are also aware of anti-Asian racism and have expressed their support.

That being said, this certainly should not be taken as evidence that "everything is fine" across higher education because selection bias might be at work. Students and colleagues simply might avoid my courses or the events that I attend if they have issues with where I am from. Moreover, because racial discrimination is not socially desirable, people may engage in impression management, making it more difficult to observe.

Indeed, I have heard troubling stories about our colleagues experiencing anti-Asian racism in both classroom and
