Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980 s combined with a widespread belief in leadership as the single most powerful contribution to such improvement The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development **Problems and Possibilities of Neoliberal Education Reforms** Mustafa Toprak, 2024-11-14 Neoliberal education reforms promise but often don t succeed to improve student outcomes and provide more equitable educational opportunities to students with different backgrounds They hold schools accountable for their performance through high stakes testing and linking performance to rewards and sanctions and by empowering parents This book presents a critical and objective appraisal of these neoliberalist education reforms Mustafa Toprak considers the practical elements of neoliberal reforms including voucher systems choice accountability competition within and between schools educational inequalities and high stakes testing and in doing this contributes to social justice debates and the idea of education as a common good He uses reforms in Chile as a case study

and offers a critique of its neoliberal educational reforms Rather than discrediting all the central tenets of neoliberal education Toprak considers the pros and cons of these reforms for students teachers schools and societies and proposes new reforms to ensure that policies accurately and responsively address the needs of all stakeholders
