Fortin,2016-12-05 The home is one of our most enduring human paradoxes and is brought to light tellingly in science fiction SF writing and film However while similarities and crossovers between architecture and SF have proliferated throughout the past century the home is often overshadowed by the spectacle of otherness The study of the familiar home within the alien SF creates a unique cultural lens through which to reflect on our current architectural condition SF has always been linked with alienation however the conditions of such alienation and hence notions of home have evidently changed There is often a perceived comprehension of the familiar that atrophies the inquisitive and interpretive processes commonly activated when confronting the unfamiliar Thus by utilizing the estranging qualities of SF to

The Culture of Disaster Marie-Hélène Huet, 2024-05-31 From antiquity through the Enlightenment disasters were attributed to the obscure power of the stars or the vengeance of angry gods As philosophers sought to reassess the origins of natural disasters they also made it clear that humans shared responsibility for the damages caused by a violent universe This far ranging book explores the way writers thinkers and artists have responded to the increasingly political concept of disaster from the Enlightenment until today Marie H l ne Huet argues that post Enlightenment culture has been haunted by the sense of emergency that made natural catastrophes and human deeds both a collective crisis and a personal tragedy From the plague of 1720 to the cholera of 1832 from shipwrecks to film dystopias disasters raise questions about identity and memory technology control and liability In her analysis Huet considers anew the mythical figures of Medusa and Apollo theories of epidemics earthquakes political crises and films such as *Blow Up* and *Blade Runner* With its scope and precision *The Culture of Disaster* will appeal to a wide public interested in modern culture philosophy and intellectual history
