It also identifies and discusses discernible changes in the composition and structure of African exports and imports between 1995 and 2015 and their implications for economic development in Africa. The study attributes Africa's laggard trade performance during the period primarily to sub-optimal macroeconomic policies and lack of bold export development policies and initiatives among other factors. It also offers an incisive discussion of several inhibitions to the structural transformation of African exports and imports including lack of finance globalization tariff and non-tariff measures in global markets. The discussion of the evolution of African trade during the period 1948-2017 based on statistics and publications of international organizations including the UNCTAD, the World Bank and the African Development Bank among others is the first of its kind in terms of scope and depth of review of African trade. The analyses of cross-border trade during 1948-2017 and their implications for Africa's economic development prospects constitute a useful reference material for academics and students of African and development studies and African and international policymakers.

Economic Development E. Wayne Nafziger, 2012-03-26 E. Wayne Nafziger analyzes the economic development of Asia, Africa, Latin America and East Central Europe. The book is suitable for those with a background in economics principles. Nafziger explains the reasons for the recent fast growth of India, Poland, Brazil, China and other Pacific Rim countries and the slow yet essential growth for a turnaround of sub-Saharan Africa. The fifth edition of the text, written by a scholar of developing countries, is replete with real-world examples and up-to-date information. Nafziger discusses poverty, income inequality, hunger, unemployment, the environment and carbon dioxide emissions and the widening gap between rich, including middle income and poor countries. Other new components include the rise and fall of models based on Russia, Japan, China, Taiwan, Korea and North America, randomized experiments to assess aid, an exploration of whether information technology and mobile phones can provide poor countries with a shortcut to prosperity and a discussion of how worldwide financial crises, debt and trade and capital markets affect developing countries.

Sustaining Export-Oriented Development Ross Garnaut, Enzo Grilli, James Riedel, 1995-09-29 This book, first published in 1995, looks at the East Asian economies' post-war development and assesses the possibilities of transferring East Asian development elsewhere. Written and edited by economists, *Sustaining Export-Oriented Development* traces the changes in the thinking of policy makers and advisers about the policies required for economic development, especially the changed emphasis from import substitution to outward orientation which coincided with the East Asian economies' success. Several contributors focus on identifying the key factors in the growth of these dynamic economies. Others look at future constraints such as the environmental limits to growth and the sustainability of export growth in China. This book makes a significant contribution to the discussion of economic growth and development issues and will be of interest to those in economics, trade and aid and others concerned with public policy.
