The Evolution of the Non-market Economy Treatment in the Multilateral Trading System Bin Zhang, 2018-06-18 This book tries to integrate

the different arrangements devised in the MTS for small and large NMEs into one analytical framework and explores two sets of rules GATT WTO minus and GATT WTO plus along three historical stages shaping weakening and strengthening The focal point of this book is to uncover the composition and structure of the NME treatment in the MTS its evolving logic and process and the nature and trend of the political economic relations between NMEs and the MTS *Understanding Kim Jong-un's North Korea* Robert Carlin, Chung-in Moon, 2022-08-16 This ambitious book is constructed to provide the reader with unusually broad and deep insight into North Korea illustrating how the Kim Jong un regime calculates balances and addresses the various key policy challenges it faces This will be accomplished through the extensive experience of the authors Korean European and American in North Korea and with North Koreans There is no substitute for such direct experience in order to address the numerous myths and misconceptions that have grown up and persisted over the years about how the North functions and how it perceives the world Moreover the usual focus on a single issue for example just nuclear or just economic matters fails to provide a sense of how important the inter relationship of these separate parts is in understanding the whole The experience brought to bear in the book and the breadth of coverage provides badly needed critical insights about North Korea at time when policy in Seoul and Washington toward the North is at a crucial hinge point

performance of selected countries including China India Japan Indonesia and the US as well as Western Europe Latin America and developing countries as a group The time period of the study is from 1850 to the present and includes forecasts to 2030 This well documented book will be of considerable interest to development economists and country specialists working on countries such as China and India economic historians who are interested in explaining the growth performance of countries economists and economic statisticians who are interested in the measurement issues and international organizations such as the OECD World Bank and the UN General readers and non specialists who are interested in the world economic performance will also find much to interest them in this book
