the actual price policies of many Third World governments While recognizing the problems involved in defining and measuring hunger as well as in improving the food supply the authors consider the outlook for future food availability as favorable in terms of continued modest improvement in per capita food supplies at prices adjusted for inflation that are likely to continue the slow decline of recent decades One focus of their comments is the positive roles that governments can and should play in the world food economy especially in support of research creation of human capital and provision of appropriate rural infrastructure
