Economies of Signs and Space Professor Scott M Lash, Scott Lash John Urry, Professor John Urry, 1993-12-09 This is a novel account of social change that supplants conventional understandings of society and presents a sociology that takes as its main unit of analysis flows through time and across space Developing a comparative analysis of the UK and US the new Germany and Japan Lash and Urry show how restructuration after organized capitalism has its basis in increasingly reflexive social actors and organizations The consequence is not only the much vaunted postmodern condition but also a growth in reflexivity In exploring this new reflexive world the authors argue that today's economies are increasingly ones of signs information symbols images desire and of space where both signs and social subjects refugees financiers tourists and flâneurs are mobile over ever greater distances at ever greater speeds Economies of Signs and Space, 1994 In exploring this new reflexive world Lash and Urry argue that today's economies are increasingly economies of signs information symbols images desire and of space where both signs and social subjects refugees financiers tourists flâneurs are mobile over ever greater distances They show how an understanding of such flows contributes to the analysis of changes in social relations from the organization of work to the culture industries from the formation of an underclass to new forms of citizenship Taking its point of departure from the authors influential *The End of Organized Capitalism* this is a book that no one in social and cultural theory geography and urban studies political economy and organization studies can afford to ignore
